# Special characteristics

## Organic shapes with multiple pendants

Used as an individual pendant, or as a playful cluster, the BELLART will add soft ambient illumination with a tactile look and feel.

## Good control of light distribution

The Foss is available in three beam angles 12° / 34° / 48°. Offering a great control of light distribution. The larger downlights with 5 modules are perfect for general lighting in circulation areas and breakout spaces.

## 3168 possible combinations

Your downlight can be truly unique considering the staggering 3168 possible combinations between 3 standard sizes, 6 standard colours, 3 colour temperatures and 4 different beam angles and several dimming options.

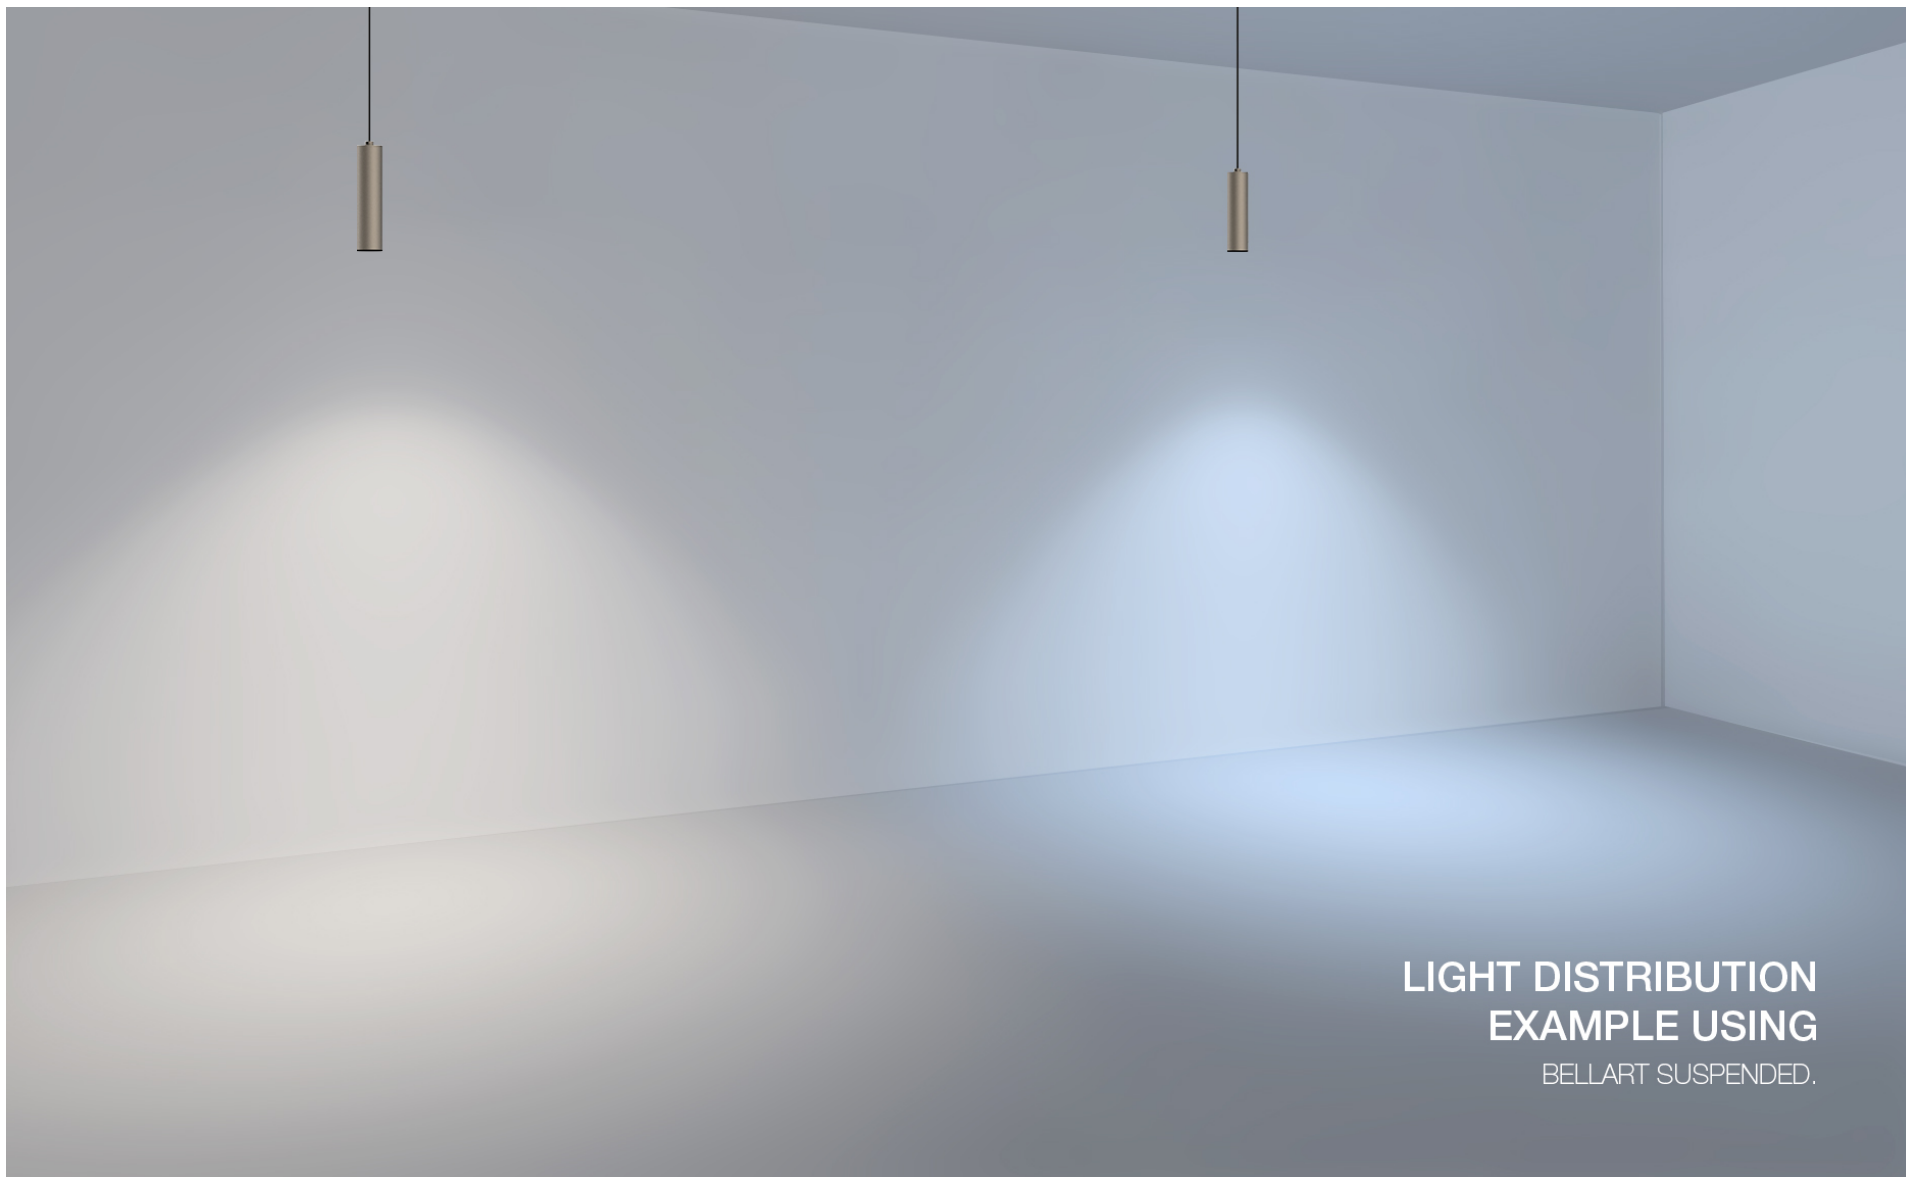

## High Output

The contemporary aesthetics and a high visual comfort. Using the latest LED technology, the BELLART can be specified with specially designed LED engines for bringing out specific colours, making it a perfect straight out of the box lighting solution for retail.

# Light distribution example

LIGHT DISTRIBUTION  
EXAMPLE USING  
BELLART SUSPENDED.

# Product in use

## 100 Brook Drive, Reading.

Dotted in between the hexagonal shaped acoustic features in a regular patterns are the **Bellart Suspended** pendants. They add a bold visual interest into the design and provide a softer light setting to the informal areas.

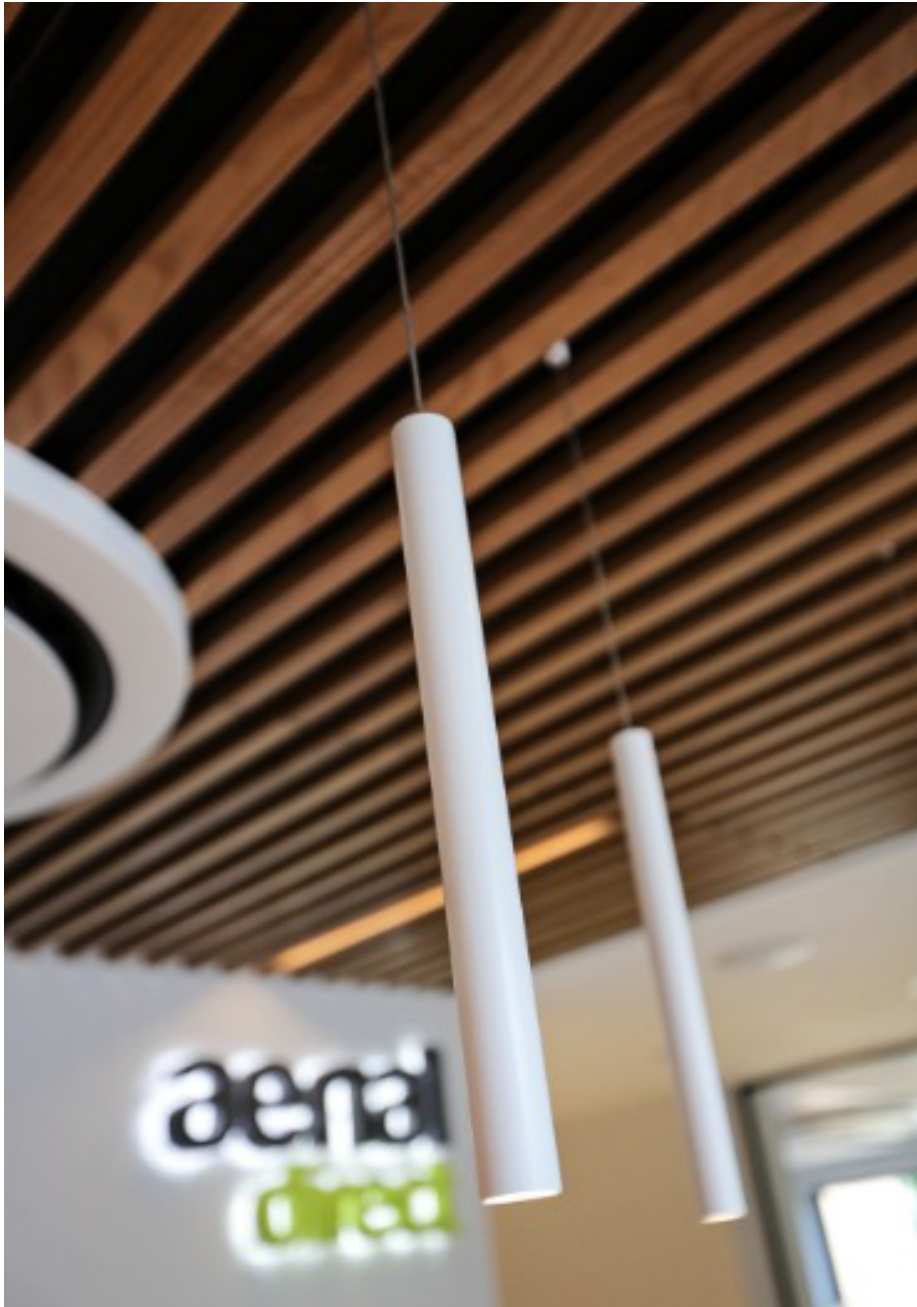

# Product in use

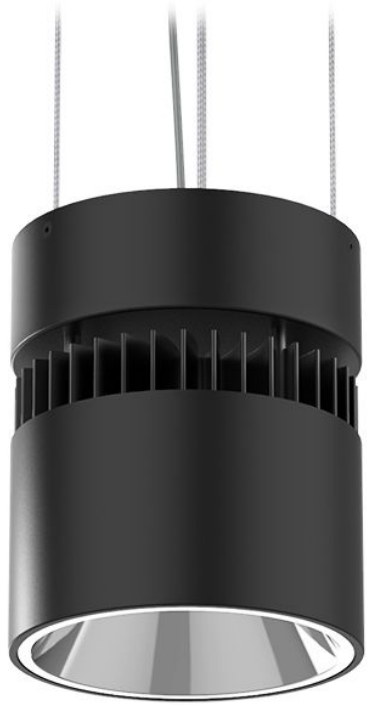

## Aerial Direct, Fareham.

Aerial Direct wanted to shift away from a classic office design looking to incorporate influences from the hospitality industry and using luxury hotel design as inspiration. In the main reception area, the suspended tubular feature pendants **BELLART** were used to add a visual interest to the space.
