

Foss Recessed

Bold and subtle at the same time, the FOSS is a small yet powerful multi-optic downlight. The minimalist design of the FOSS makes it a perfect lighting solution achieving a clean look in contemporary architecture. Offering a high visual comfort, a cool design and easy installation, the FOSS is a welcoming change to traditional recessed downlights. It has all qualities for setting new standards in recessed lighting. The contemporary and unique design of this small linear downlight can turn into design element of your commercial scheme.

The Foss Recessed Family

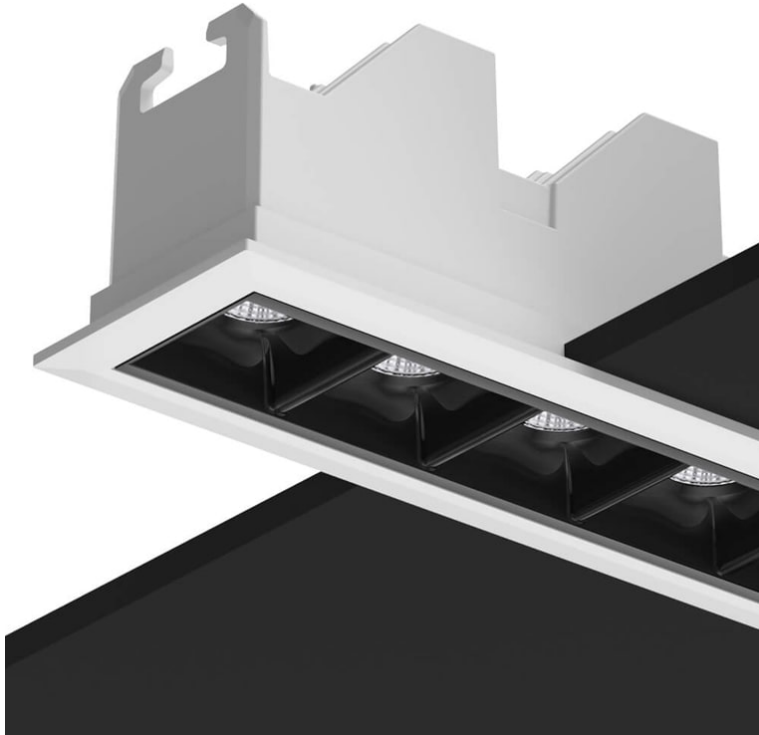

Foss Recessed Trim Fixed

Foss Recessed Trim Adjustable

Special characteristics

Low glare optic

The die-cast aluminium body combined with high gloss optics create the innovative anti-glare illumination of UGR <13.

Using one or multiple optics to diffuse the light, the FOSS offers a high visual comfort improving the well-being in workplace.

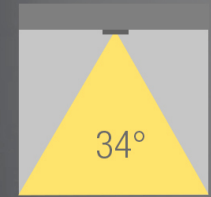

Good control of light distribution

The Foss is available in three beam angles 12° / 34° / 48°. Offering a great control of light distribution.

The larger downlights with 5 modules are perfect for general lighting in circulation areas and breakout spaces.
