

The Rio

The RIO is the ultimate performance driven slim linear profile. Designed with simplicity and attention to detail, the RIO is contemporary and stylish. Used as an individual luminaire or a continuous linear lighting system, the RIO adds a contemporary feel to any workplace or architectural spaces, creating clean lines of light. It's our best seller.

Special characteristics

Customization system and shapes

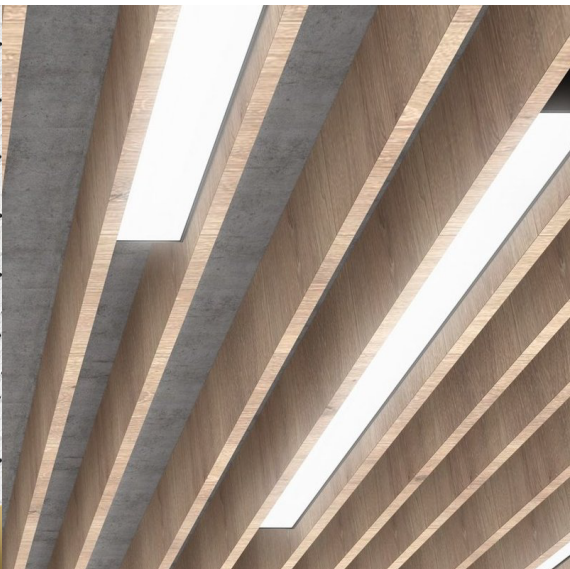

The design of the RIO lends itself perfectly to made to measure linear lighting solutions.

It gives the designer a true freedom creating a vast array of dimensional combinations.

Versatile

Thanks to its superb build quality, excellent performance, and high visual comfort it is a perfect linear LED lighting system for stimulating working environments and schemes looking to achieve LG7 compliance.

Easy installation

Thanks to the wago connect system, the luminaire distributes edge-to-edge light with zero light bleed.

The click-in gear tray make the RIO the perfect straight out of the box LED linear lighting solution.

5 different diffusers

First in its class, the RIO is not just about being office lighting in a different body, it offers 5 different types of diffusers, the RIO presents a welcome change to the usual linear LED lighting.

Light distribution example

Rio Suspended in use

42-44 Gerrard Street, London.

The workplace area was specified with the Rio Suspended. The suspended linear lighting profile Rio was used across the entire scheme as the main office lighting. It was specified in matte black colour in several different sizes .

71-73 Carter Lane, London.

LiveWest, Weston-super-Mare

100 Brook Drive, Reading

Champan House, Arsenal FC

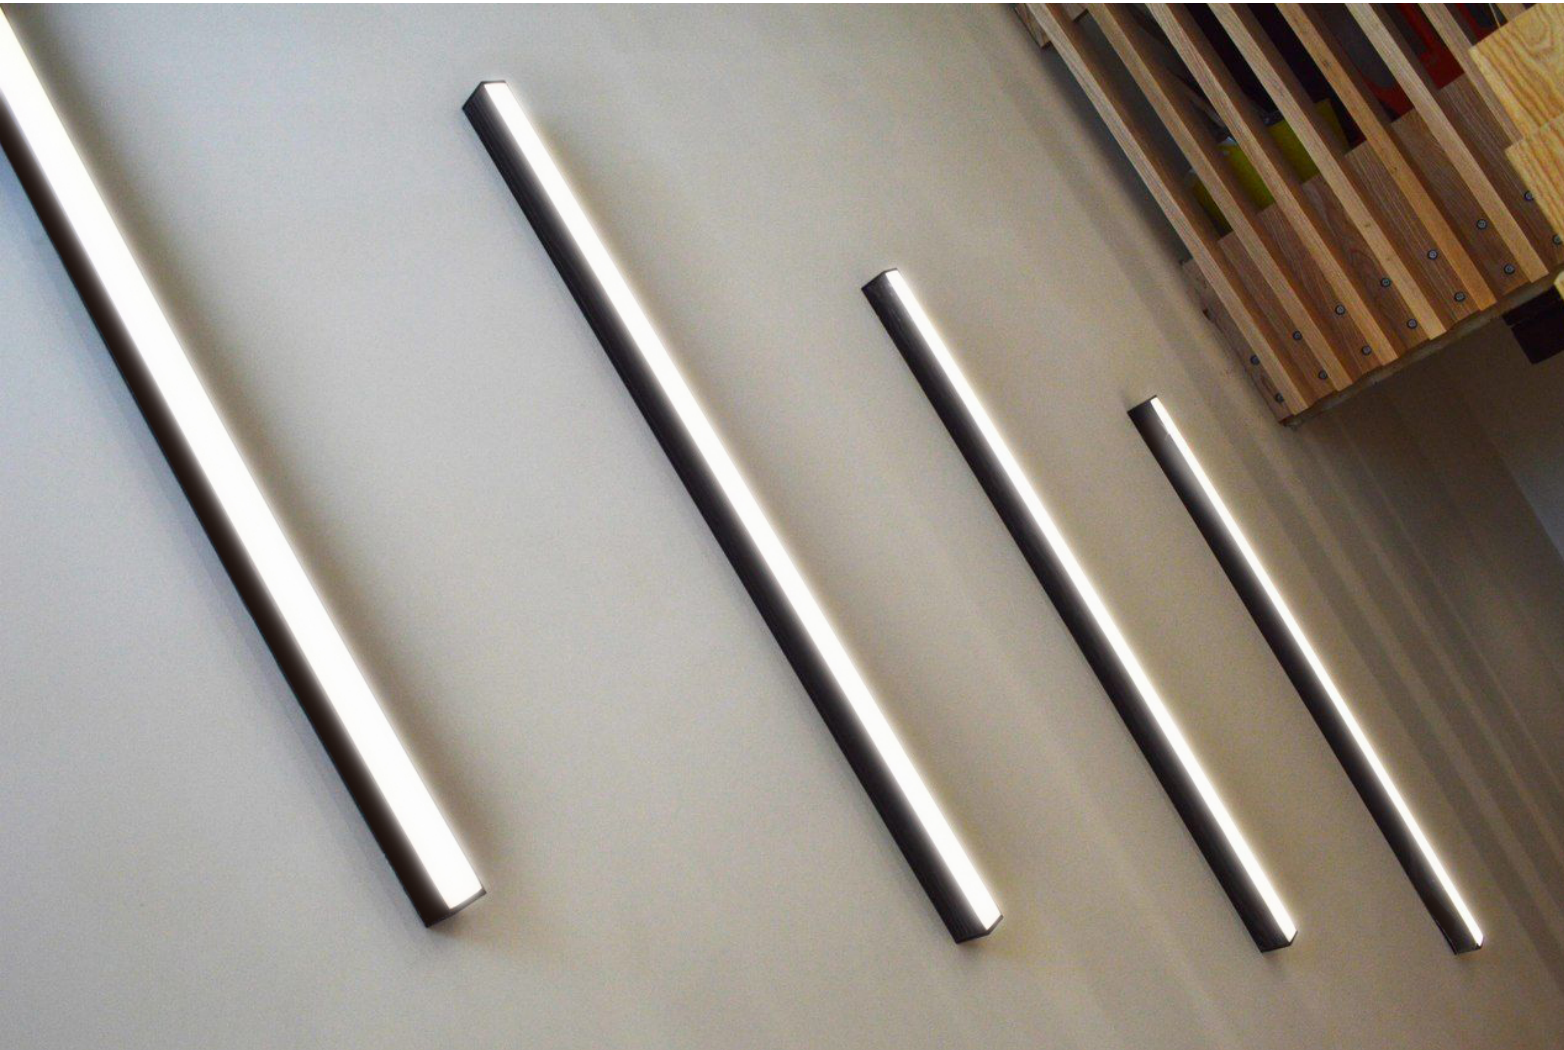

Rio Surface in use

Aerial Direct, Fareham.

The custom ceiling with linear joinery detail in the main reception area and collaborative spaces features the slim linear profile RIO installed in a random pattern. This adds a dynamic and playful feel to space, mirroring the dynamic nature of client's business.

Rio Wall: similar product in use

10 Bard Road, London.

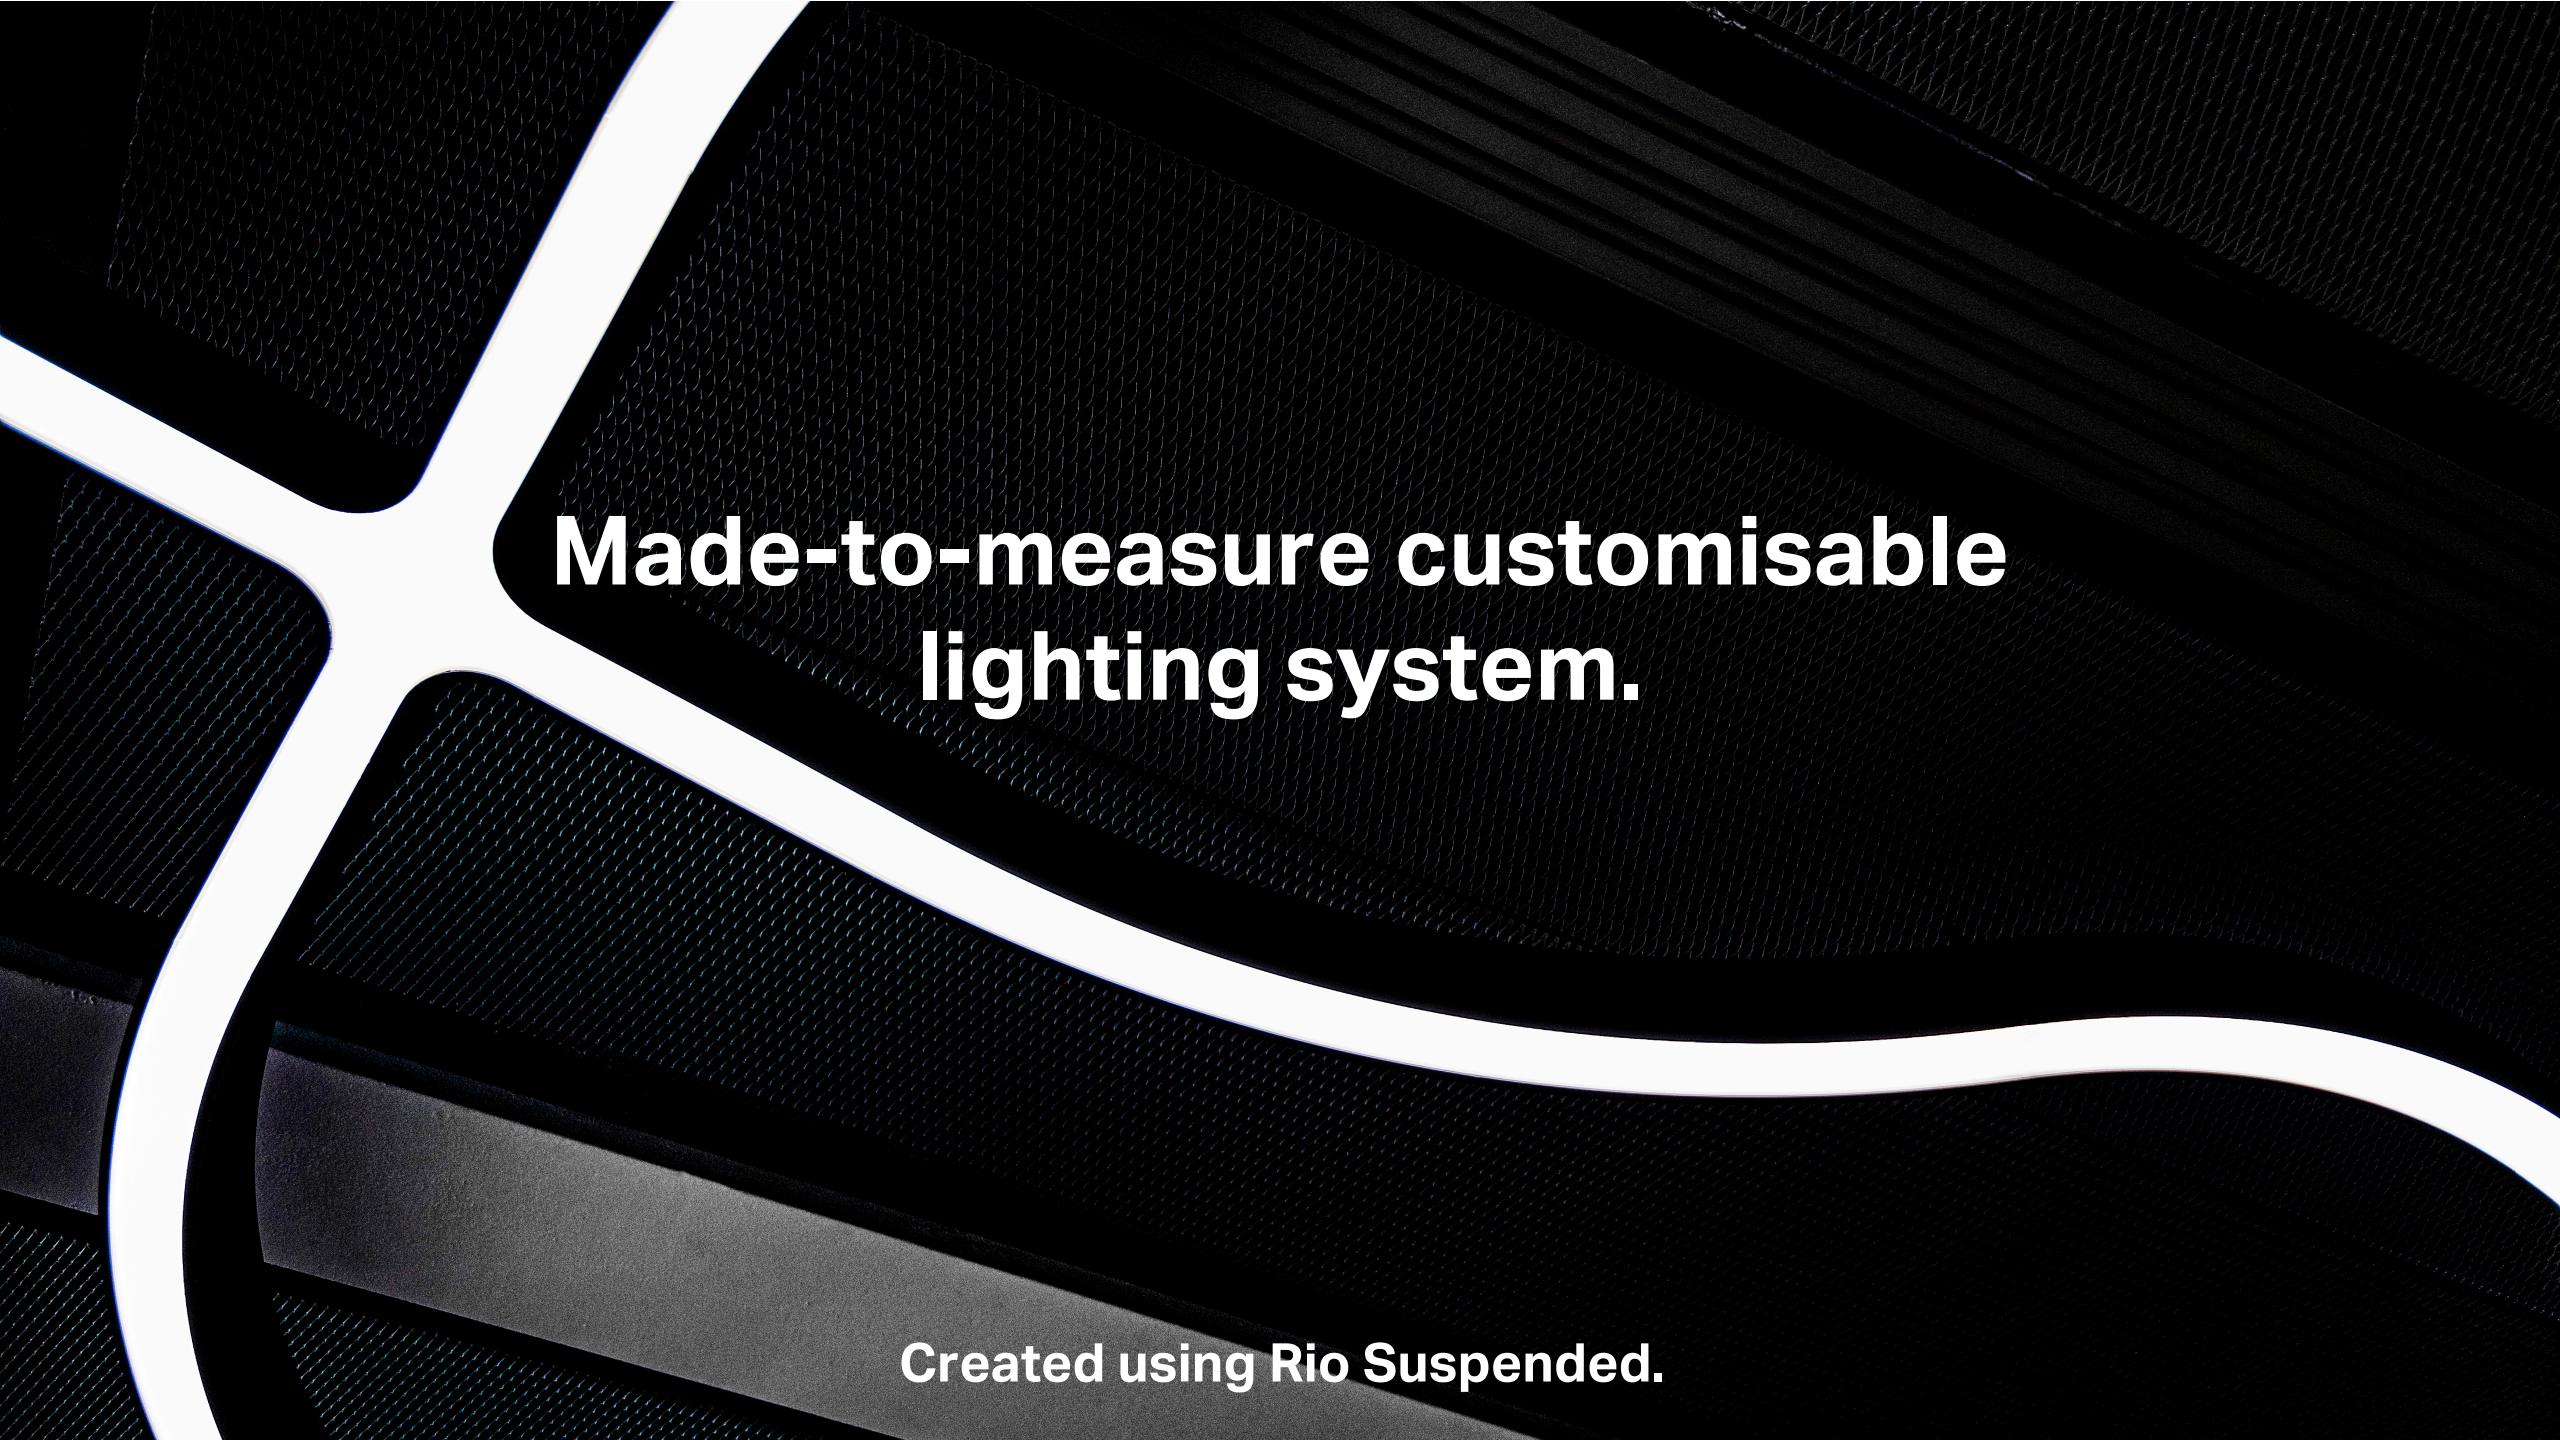

Similar to the Rio, for the staircase and half the landings, the slim wall luminaire Leck Wall were designed in a repetitive style to create a strong visual impact. The black finish creates a striking contrast.

Rio Recessed: similar product in use

80 Cannon Street, London.

Like the Rio, The suspended linear profile, Lopen Recessed Trimless in custom length was used to run alongside the edges of the plaster board to provide sufficient illumination of the workplace.

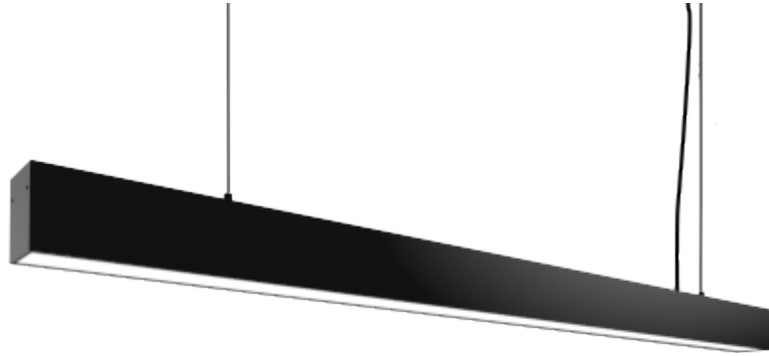

**Made-to-measure customisable
lighting system.**

Created using Rio Suspended.
