

OCEAN

TECHNICAL INFORMATION

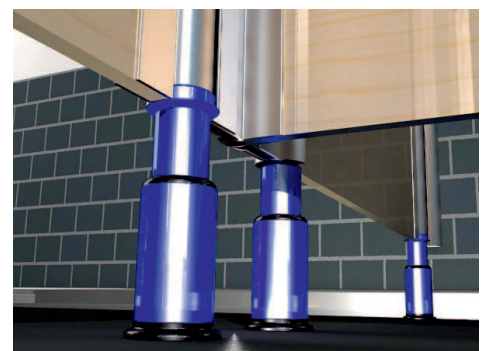

The OCEAN fully framed cubicle system has been specially designed for use in changing areas, washrooms and public toilets where durability is a prerequisite.

Combining clean lines with extreme strength, the cubicles are especially effective against daily wear and tear associated with high use areas.

The substantial headrail runs throughout the full length of the cubicles and, in the case of a free standing or corner configuration, returns to the back wall along the partition via a solid cast corner piece.

The hinge design allows the door to be left or right hand hung, inward or outward opening and fall open or fall close.
