# Able Shade Sail Technical Specification

## Size

A single sail can be a maximum width and length of 6m.

## Sail Material

Heavy duty, professional grade shade fabric made from UV stabilized HDPE monofilament and tape yarns in a specialized lock stitch knit for more air movement and better channelling of cooling breezeways.

## Posts

Up to 6m in length, 168.3mm diameter. Galvanised mild steel posts for ultimate corrosion protection. Please note: posts are angled back at 10 degrees

## Fabric Colour

Available in a range of 15 contemporary colours. Please see chart opposite. Colours are representative only; small variations in colour should be anticipated and are within commercial tolerances

## Life Expectancy

Our Shade Sail posts offer a life expectancy of up to 25 years (anti corrosion); subject to the chosen finish and adherence to the maintenance schedule. Our Shade Sail fabric carries a 10 year guarantee against UV degradation.

## Weather Resistance

The Shade sail material is UV stabilised offering the highest UV protection. They block up to 98.8% of the sun's harmful UV rays.
