ProVision

ProVision har en diskret, tunn ram av aluminium, och är utrustad med SilverPro™ ytan -en unik, magnetiskt, matt och elegant glasyta.

ProVision has a discrete, thin frame of aluminium, and is equipped with the SilverPro™ surface – a unique magnetic, matte elegant glass surface.

ProVision hängs på två metallprofiler med 7 mm distans från vägg och 2000-2100 mm (ramens överkant) över golv.

ProVision is suspended with two profiles (brackets) at a distance of 7 mm off the wall and 2000-2100 mm from floor to upper edge.

Kan mot förfrågan även levereras i specialmått samt monteras så att tavlan kan hängas på högkant.

Standard board format is horizontal. The boards can also be mounted vertical per customer request.

ProVisions gerade ram av naturanodiserad aluminium har en tjocklek på enbart 1,2 mm, vilket gör att skarven blir minimal när flera tavlor monteras tillsammans för en större projektyta.

The slimline anodised aluminium frame allows for modular groupings.

Every whiteboard in the Abstracta range has an E3 surface; an environment-friendly, glass enamelled, sheet of steel. The writing surface is magnetic. E3 is recommended for short throw projectors only.

A special "White board kit" is available as an accessory. This has been developed to fit the E3 surface and includes: eraser, markers, penholder, bottle of cleaning fluid and magnets.

SilverPro™

SilverPro™ is unique to Abstracta – a frosted glass writing board with a projection and magnetic surface. There is no need to add a projection screen, just project directly onto the glass board. SilverPro™ is recommended for front projection. A special "Magnetic glass board kit Pro" is available as an accessory. This has been developed to fit the SilverPro™ surface and includes: eraser + felts, markers and magnets.

Optical White Glass

Tempered optical white flat glass with lacquered, tempered reverse side. The surface of optical white glass, e.g. Vision, is not magnetic itself.

To achieve the magnetic function, a discrete magnet rail can be mounted on the reverse side; the product is then designated MagVision. Optical white glass is not suitable for projection.

A special "Glass board kit" is available as an accessory. This has been developed to fit the Optical white glass surface and includes: eraser and markers.
