- Incomparable robustness and stability
- Compatible with profiles in aluminium, ABS, PVC etc.
- Acoustic optimisation (together with a sound absorber)
- Printable coverings
- Paintable and washable
- Back-lighting may be incorporated
- 10-year manufacturer's guarantee
- French manufacture certified ISO 9001

Environmentally friendly

- Environmentally-friendly PVC-free coverings
- Oeko-Tex Standard 100 green label
- A+ labelling (the best score) for improved interior air quality
- Free from carcinogenic substances (CMR) and volatile organic compounds (VOCs)

clipso sound®
Acoustics, noise reduction

Hear the quality!

In our modern world, one of the greatest luxuries at home and at work is the acoustic comfort and quality of our surroundings.

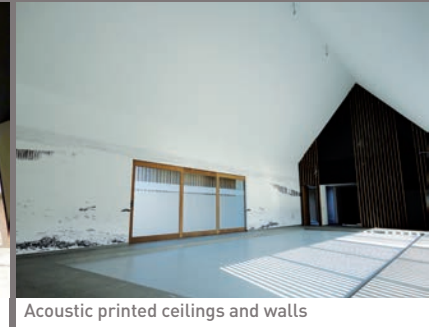

After several years of intense research, CLIPSO® has developed the CLIPSO Sound® range of acoustic coverings. The 250,000 micro-holes per m² in the covering, plus a sound absorber, give the covering a high acoustic performance: $\alpha_s = 1$ – Rating: A*
They thus absorb up to 90% of noise (conversation, music, etc.) for improved acoustic comfort.

The perfect combination of comfort and style.

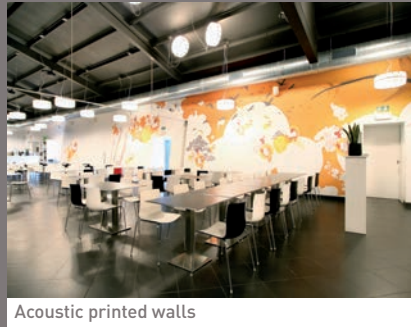

* Grade calculated on the basis of an empty plenum space of 55 mm, and 100 mm of glass wool.

clipso translucent®
Exceptional ambient lighting

Light and life go hand in hand.

Lighting defines the appearance and perception of the space. It also creates a specific atmosphere and adds to our sense of well-being.

CLIPSO Translucent® coverings diffuse up to 70% of light. Used for back-lighting, colour changes or projections, they create a light, warm environment.

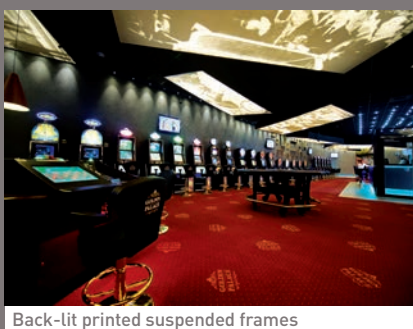

Come on a journey through the world of light and colours...
