Scivola T and Scivola Tre - Locks for sliding doors

Closes, always...

The special movement of the hook and the considerable coupling tolerance with the stiker, make the door always close, even facing vertical settlements after the installation.

The lock concept derives from SCIVOLA TT: the hook throws from the lock forend and rotate onto the striker plate when closing.

... and precisely!

Scivola T and Scivola Tre transmit a pleasant sensation of smoothness by moving the handle and the key, thanks to a great precision in the mechanical coupling and the smooth internal kinematics.

Fast and accurate installation

After the installation of the lock and the throw of the hook, by softly pushing the door against the jamb it is possible to centre the striker.

The striker installation has never been so simple: it just takes a milling of \varnothing 25 mm and a drill. Jigs are not required.

The patented head of the hook distinguishes for being sharpened. It works as a jig, marking the centre of the milling on the jamb for the striker housing.

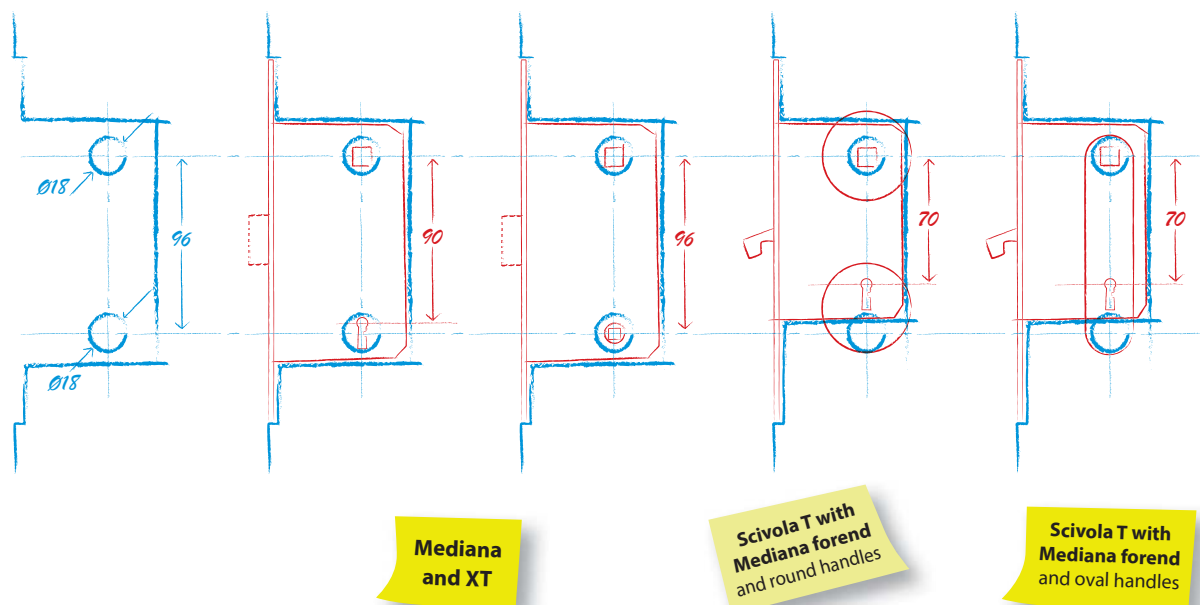

Thanks to the special shape, the covering tray is simply and precisely positioned onto the milling.

In less than 1 minute it is possible to mount the striker reaching a valuable aesthetic result.

Scivola T is compatible with the Mediana and XT locks

The drill of Scivola T grants the complete interchangeability with Mediana and XT locks for swinging doors.

Scivola Tre: Three closures, just one drill

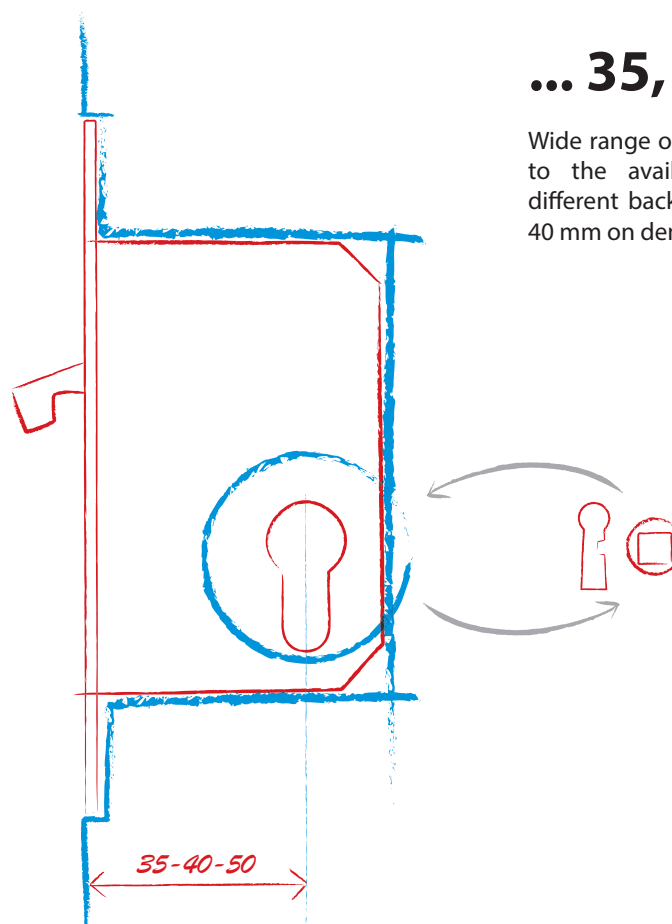

1, 2, 3...

Perfect interchangeability among Scivola Tre due to the standardization of the drill. It allows to choose the type of closing just as installing it.

... 35, 40, 50

Wide range of solutions thanks to the availability of three different backsets: 35 mm and 40 mm on demand and 50 mm.

Scivola T and Scivola Tre - Locks for sliding doors

The elegance of made in Italy handles

Wide range of kits including Scivola locks with round, oval and the new square handles.

Expanding spindle suitable for doors 30 to 53 mm thick.
