About us

Allgreen was established in 2005 supplying materials and tools to the landscape and building trade. Now with a wide stock range including many unique products, we have grown into a reliable and strong trading partner. The key points attributable to our progress are listed below.

Extensive Product Range

We hold stocks of a wide range of materials enabling you to buy from one place and reducing valuable time often lost in sourcing your requirements. We aim to be your first point of call for all your landscape material needs.

Large Bulk Stocks

To back up the extensive product range we have the supply strength needed to make us a complete supplier. With vast stocks of bulk materials and sophisticated production facilities which include topsoil recycling and compost processing plants, bark and wood processing plants and aggregate and stone quarry management & we are confident in supplying your large bulk requirements.

Unrivalled Service

This aspect completes the trio; range, stock and service. Without it the other two are as good as worthless. Allgreen have built their business up on service and this still forms an integral part of the Allgreen ethos. Customers can testify to the fact that they place the order with us with the assurance it will arrive when required, from small daily essentials to large bulk orders.

Unique and Recycled Products

Allgreen have developed and created many unique products based mainly on client requirements. As we grow in our development of waste product innovation, we continue to add new products for you to in turn offer to your clients. By constantly presenting fresh ideas and inspiration - we want to encourage you to offer unique concepts to your clients.

Trust

Unique in our industry and standing apart, we confidently can say we are a 'trade only supplier.' We reward custom and loyalty with referrals and contracts when offered to us when our products are specified. We only recommend who we know and whom we have a sound trading relationship.

Quality Assurance

Good word travels fast and our quality products having gained reputation over the years, so that we are known for providing well priced products that work. We are committed to ongoing research and perform regular quality control checks on all products. We believe in what we sell and it is important to us that you receive the quality and consistency that you require.

Product Support

With a helpful friendly team of mixed horticultural and construction backgrounds, we can provide the technical support, an unrivalled sample service and quick response so necessary to assist you in your requirements. We can offer product application and installation advice with handy tips, full product installation training and site demonstrations.

Collection Facilities

Why not collect your goods at your convenience? We are open from 7am till 4.30pm Monday to Friday and we welcome you to visit our nearest depot. You can view our products in the flesh and can take away free representative samples, product literature and written proposals.

Environmental

We're dedicated to the practice of sound environmental stewardship and have made and continue to perform changes to improve our environmental impact.

Recent changes include:

- 1] Company vehicle sharing among staff to reduce the amount of vehicular movements therefore cutting down on emissions.
- 2] Metal, paper and plastic recycling which would normally have gone into landfill. This includes packaging and strapping, office waste etc and equates to 80tons being saved from landfill per annum.
- 3] Recycling pallets and crates. This has dramatically reduced the amounts of new pallets and crates being purchased and we successfully banned the purchase of any pallets at the end of 2010. This also means they are saved from becoming part of general waste and going into landfill. We reuse in excess of 2000 pallets and crates per annum.
- 4] All electrical appliances and equipment being programmed to power saving mode. This has dramatically reduced the amount of electricity by half.

Bark, Mulch & Woodchip

Product	Stock Code	Description	Product Range	Size	Pack Icon	Pack Type	Unit	Price
	BM120	EGRO AMENITY MULCH Organic composted whole tree chippings.		1-50mm		Bulk loose	m ³	£36.75
