Doing more for safety and hygiene

AltroCrete™ PU Excel

Recently-formed soft drinks manufacturer, Cawingredients Ltd., has chosen Altro's PU resin flooring for its flagship production facility in Northallerton, North Yorkshire.

Altro's PU resin flooring, AltroCrete PU Excel, was specified for the new 10,422sqm factory as it provides outstanding protection against the demands of a food and drink production environment. Guarding against challenges such as extreme temperatures and risk of spillages, AltroCrete PU Excel also conforms to strict hygiene requirements, making it the obvious choice for a busy carbonated drinks manufacturer.

AltroCrete has been installed in a striking bright green colour to give a highly practical textured surface that offers slip resistance and a durable hardwearing finish to stand up to the wear and tear of the site's 100+ staff.

The PU resin floor range not only offers fast track installation and moisture resistance, but it's particularly suitable to food and beverage production facilities as it is tolerant to high and low temperatures commonly associated with the industry (from -40°C to +120°C).

Altro is already doing more for a long list of satisfied clients. To see how we can do more for you please contact us by:

We've used Altro's flooring products before and find the resin range is an excellent choice for the food industry. It ticks all the boxes for safety, hygiene and the environmental challenges of a busy manufacturing plant, whilst being easy to install.
