ALTRO PLAYS VITAL ROLE AT PERFORMING ARTS SCHOOL

Altro Suprema™ II, Altro Whiterock Chameleon™, Altro Marine™, Altro Atlas™, Altro Classic™, AltroSmooth Ethos™

A wide range of Altro flooring and wall cladding is meeting various specific needs in different areas throughout an £18 million new build at Brannel School, in Cornwall.

Brannel School is a specialist college for English and the performing arts. Its ultra-modern new facility, which has been funded by Cornwall County Council, incorporates a host of hi-tech features and state of the art equipment; Mac Books and iPads are used instead of blackboards, and swipe cards in place of the traditional register. Students can film their own weather reports in the green screening room and there are also environmentally friendly toilets, a solar roof and an all-weather pitch.

Brannel School's corridors were fitted with AltroSmooth Ethos™, a smooth flooring with an attractive timber appearance that provides a seamless, hard-wearing, hygienic surface. In the kitchens, Altro Stronghold 30™ has been used. This 3mm thick flooring is designed for safety where spillages are likely. It also provides excellent slip resistance, durability and ease of cleaning.

Altro Suprema™ safety flooring was installed in the school's dining area. This product is ideal for general use anywhere where there is a heavy footfall and comes in wide range of colours.

For further information on Altro's vast product range of interior surfaces, which also includes doors and ceilings:

Altro Marine 20™ flooring and Altro Whiterock Chameleon™ wall cladding were specified for the school's medical suite. Marine 20 is a 2mm thick textured surface specially designed for safety with wet, bare feet or soft soled footwear. It incorporates coloured chips and grains to enable it to blend with various colour schemes.

Altro Whiterock Chameleon is a high gloss wall cladding available in a range of vibrant tones. Both Altro Marine 20 and Altro Whiterock Chameleon include integral Altrosan™ bacteriostat for enhanced hygiene.

Many different types of safety flooring were fitted in the school's technology and woodwork laboratories –- Altro Atlas 40™, Altro Classic 25™ and other 2.5 safety floors. At 4mm thick Altro Atlas 40 is the toughest of Altro's safety flooring and ideal for heavy-duty locations.

Altro Classic 25 is Altro's original slip resistant flooring. It combines silicon carbide in the surface and aluminium trioxide throughout the thickness for lasting slip resistance.

All the Altro flooring was installed by Lang & Potter (Flooring) over a 12-week period. Business Manager Mark Wood, said: "This was a great project to be part of. We installed 5,000m² of flooring overall and we worked closely with Altro to ensure the products arrived on time and everything went according to schedule. They gave us great back-up, as always, so it went very smoothly.

"Altro products are so easy to install and their range is ideal for a new build like this, where different types and capabilities are needed throughout the school. For example, the Ethos flooring in the corridors is very authentic as a wood effect product, so it looks good, but also provides great durability. Also, in the technology and woodwork laboratories, Altro Classic 25 is a great choice because it's a high grade industrial flooring, so it'll take some pretty hard knocks."
