

Altro performs for Arts College

**Altro Designer 25, Altro Walkway SD,
Altro Everlay A, Altro Mondopave**

When Pendleton College in Manchester was planning its new performing arts centre, it needed products that were multi-talented performers. As well as flooring products that would offer heavy duty durability for areas of high traffic, the college had to think of the safety of pupils. In addition, due to the specialist electronic equipment in the college's TV studio, the products chosen for these areas could not interfere with the recording devices.

DLA Architecture was appointed to design the new building and the architects put the spotlight on Altro and its wide range of specialist and safety flooring. Everlay A and Walkway SD were fitted in the TV studio for their combination of durability, safety and anti-static properties. Designer 25 was installed in the theatre balcony while Altro also kitted out four of the college's staircases with 400 m² of Mondopave tiles. Aluminium treads and risers were also used on the staircases. The main corridors, as well as the kitchen and servery area, had Designer 25 installed.

"With the particular nature of the TV studio we had to specify a flooring product that would perform without affecting the electronic equipment; Altro had the perfect answer. It's reassuring to know that when the next generation of performers tread the boards at Pendleton, they do so in absolute safety."

Rachel Mosley of DLA Architecture

"I have been working with Altro products for years as they never fail to impress. At the college the installation went smoothly and we have had no problems since the floors have been laid. With the look and performance of the products, the project had a real sense of achievement."

Phil McIntosh of CMC Flooring
