

WOOD EFFECT ALUMINIUM WINDOWS & DOORS

Wood'n it be nice to have the look of timber without all the hassles associated with real timber. Well now you can – with a special paint process which combines all the advantages of aluminium with the warm look of 'real' timber.

 **Decoral** is a specially developed procedure where the design is applied to each bar via a heat-transfer onto a previously applied base colour.

Available on all our Window & Door systems and even Curtain Walling systems, Decoral is suitable for external use and is Qualicoat approved.

- No distortion or shrinking problems as associated with timber clad products.
- Dual colour option available
- Tough hard wearing finish.
- Thermally broken aluminium available.
- Document 'L' compliant option available.
- Facilitates high security hardware
- Excellent resistance to solvents.
- Qualicoat approved.
- Very low maintenance.
- EPDM gaskets.

The application method ensures that the design look is consistent throughout the bar and follows the contours of even the most intricate of profiles.
