BUILDING PRODUCTS

25/14 Restraint System

By Ancon Building Products

Detailed description

Features:

- Designed to tie brickwork external walling to steel stud framing system.
- Vertical channels are fixed to the steel studs through insulation boards placed in the cavity.
- Pre-punched holes are positioned at close centres to ensure a fixing position is always located near the end, even when the channel is cut on site.
- Ancon SD25 ties can be positioned at any point along the channel length and are built into the bed joints of the outer leaf of brickwork.
- Type B tie to Building Regulations (E&W), Approved Document E.
- NHBC Approved.

Restrictions:

Unsuitable for use with flexible or semi-rigid insulations.
