

Aluminium Wall Coping

Product Description

Aluminium copings have become the widely accepted alternative to stone copings and are now a first choice owing to their lightweight, corrosion resistant, low maintenance and aesthetically pleasing characteristics.

Properties

Made from 1050AH14 grade aluminium sheet to BS2997 (EN612) with thickness determined by wall width,

| | |
|-------------|-----------|
| Up to 450mm | 2mm sheet |
| 450mm + | 3mm sheet |

Downward pointing legs are manufactured 75mm long with 15mm drip return as standard but alternative dimensions available.

Radius coping - True or faceted radius available.
Available Mill Finished (uncoated) or coated on ARP's in-house Polyester Powder Coating line to clients choice of RAL or BS standard colours.

Installation

Please refer to ARP Trueline Coping installation guide for details

Functional Life Expectancy:

ARP qualifies that when installed correctly and maintained in accordance with its product guidelines and O&M procedure, its products are designed to give a minimum effective functional life expectancy of 30 years.

Specification Information

Clause: R10/311 Aluminium Coping

Product: Trueline Aluminium Coping System

Manufacturer: ARP Ltd
Unit 2 Vitruvius Way
Meridian Business Park
Braunstone, Leicester
LE19 1WA

Handling & Storage:

Copings and other bespoke fabrications, particularly with a polyester powder coat finish should be handled with care and should preferably be stored under cover on racks to prevent scratching. All lengths are supplied in protective polythene wrapping and components are suitably packed in boxes. If painted products are to be stored outside, cover with a tarpaulin to guard against water ingress into the protective polythene. Mill finish items should be stored undercover to avoid uneven oxidation prior to being fitted.

Maintenance:

In order to maintain proper working order, gutters should be periodically cleaned out and any built-up debris removed. Check all fixings are secure and take any remedial action to rectify if necessary. To maximise the life of the decorative paint finishes, all parts should be washed down with clean water at least every 12 months and any damage repaired. In marine/industrial environments, this period may need to be shortened to 6 months.
