General information

A general-purpose plastic access panel. Ideal for plasterboard and wood backgrounds, providing easy access to hidden services in residential as well as commercial projects. The panel is ideal for retrofitting where electrical controls or plumbing and valves need to be concealed.

Description

Handi Access Panels are white, plastic panels with a picture frame. Panel may be painted to suit décor if required. The panels are easy to open using a screwdriver.

Hinges: plastic

Door: fully removable

Dimensions

Panels are manufactured in 2 standard dimensions (hinge size first):

Large Handi Access Panel (mm):

Aperture size: 300 x 300

Total size with frame: 358 x 358

Small Handi Access Panel (mm):

Aperture size: 235 x 150

Total size with frame: 280 x 193

Installation:

1. Cut aperture in wall or ceiling 5mm larger than aperture size.
2. Remove panel door
3. Apply sealant to inside flanges of frame
Before fitting check that the hinge is on the correct side
4. Making sure that the frame is level and plumb (use suitable packers if necessary), press frame firmly into the opening to ensure a tight seal.
Do not replace the panel door until the sealant has cured completely.
5. Replace panel door.
6. Decorate if required.
