Brief overview of product range:

The ATG Access 114/900 Tall Retractable Bollard is utilised where visibility may be an issue. The increased height brings the bollards to the attention of pedestrians and is often utilised where large crowds of people may pass through an area.

The product is available in a variety of finishes. Our unique lift-assist mechanism which is fitted as standard with this bollard enables us to supply heavy duty robust security solutions which can be operated by all. The mechanism reduces the products lifting weight by as much as 70%. The product is also available in a static version to compliment the fully retractable product.

Applications this product will protect

Pedestrian areas, high-profile stadia and buildings, universities and city centre areas.
