## Parking Post – Manually Retractable

### Statistics Table

Diameter	76mm
Height Above Ground	500mm
Lifting Weight	6-7kg
Foundation Depth	825mm
Finishes Available	Yellow or Black RAL coated
Security Rating	Deterrent bollard

### Brief overview of product range

The ATG Access Parking Post is designed predominantly for domestic applications, parking protection and small car park applications for schools and office blocks.

The inner post simply rises vertically and locks in the upright position with an integral push button lock, providing a convenient way of securing most sites. Unlike removable bollards, this Parking Post does not need to be stored. Once fully retracted into the ground and the lid lowered, there is no trip hazard for pedestrians.

This Parking Post is available in yellow and black. As this product is also very easy to install and service, it is ideal for residential and small commercial applications.

### Applications this product will protect

Driveway security, garage door protection, parking protection and commercial car park security.

### Standard Finish:

- ❖ 3 mm wall thickness for easy operation.
- ❖ Highly visible yellow or black RAL finish for high visibility
- ❖ A manual service kit is available with this product for the customer to service the product easily themselves.
