

Bailey

Bailey Fleet™
Rainscreen System

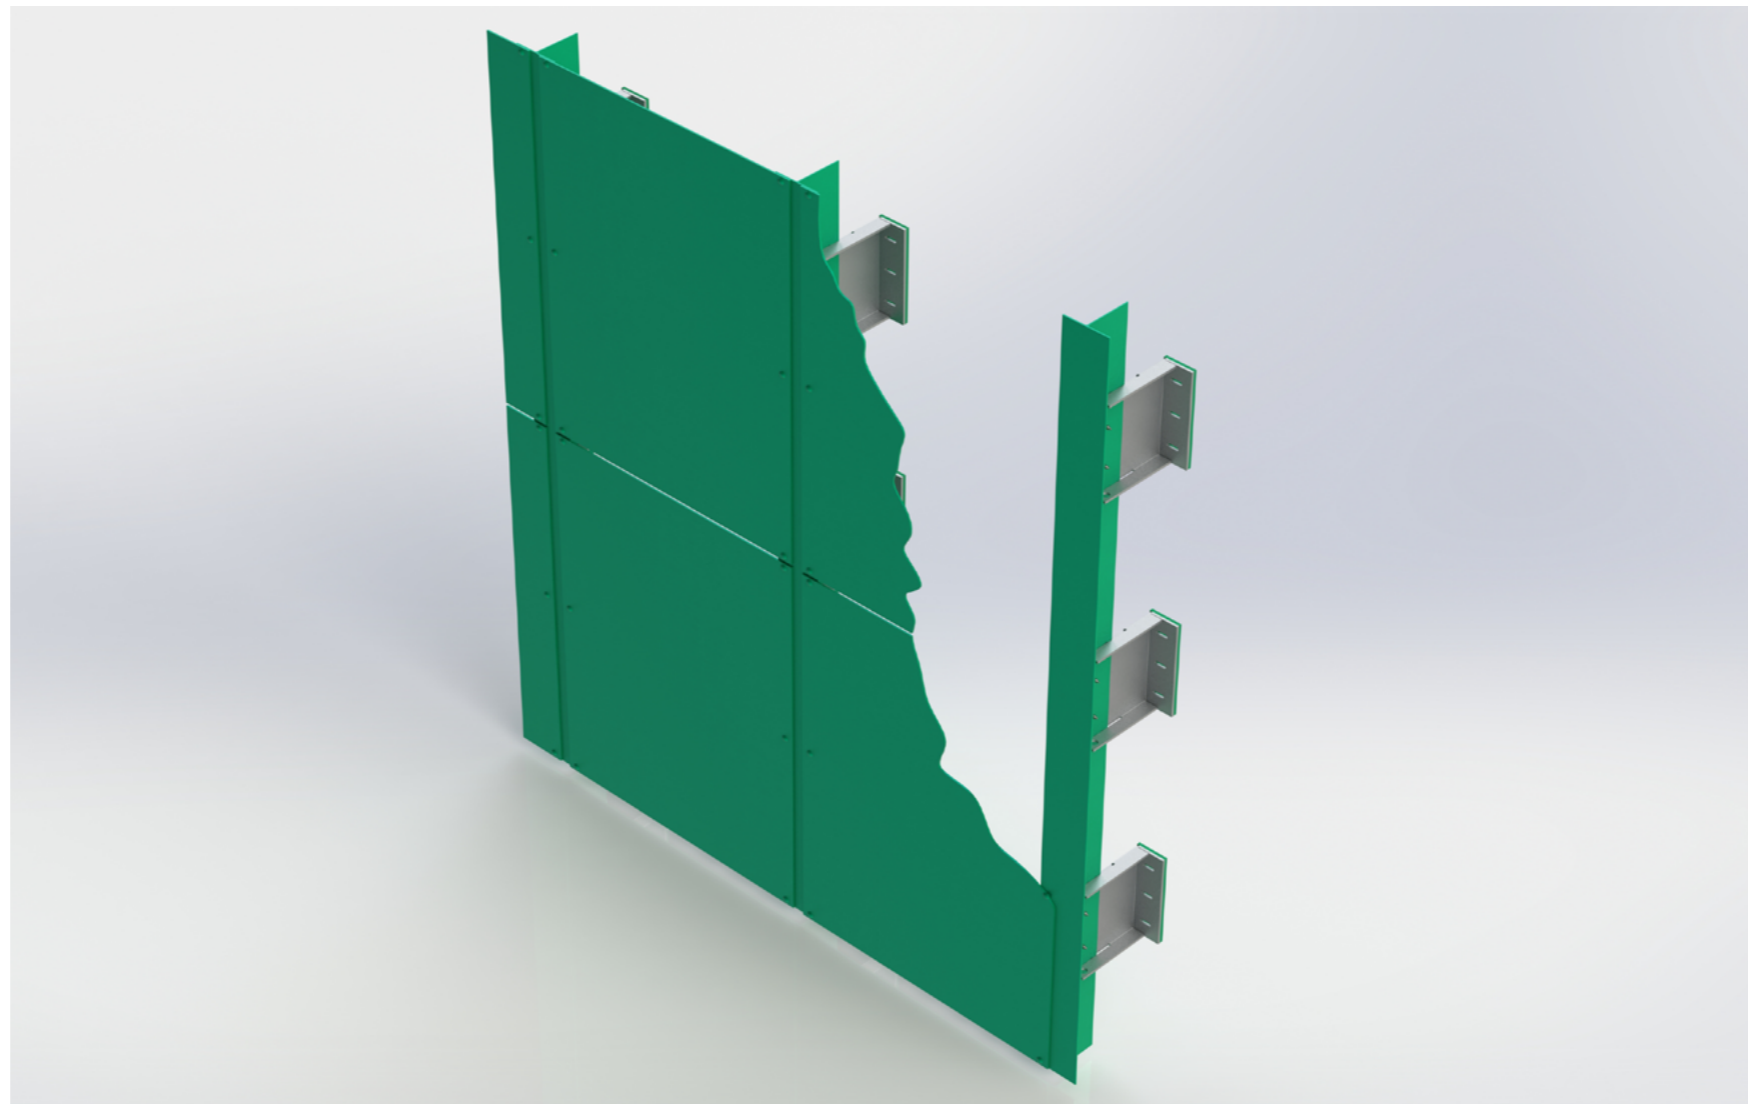

Curved or flat,
face fixed system
with design flexibility

Key benefits

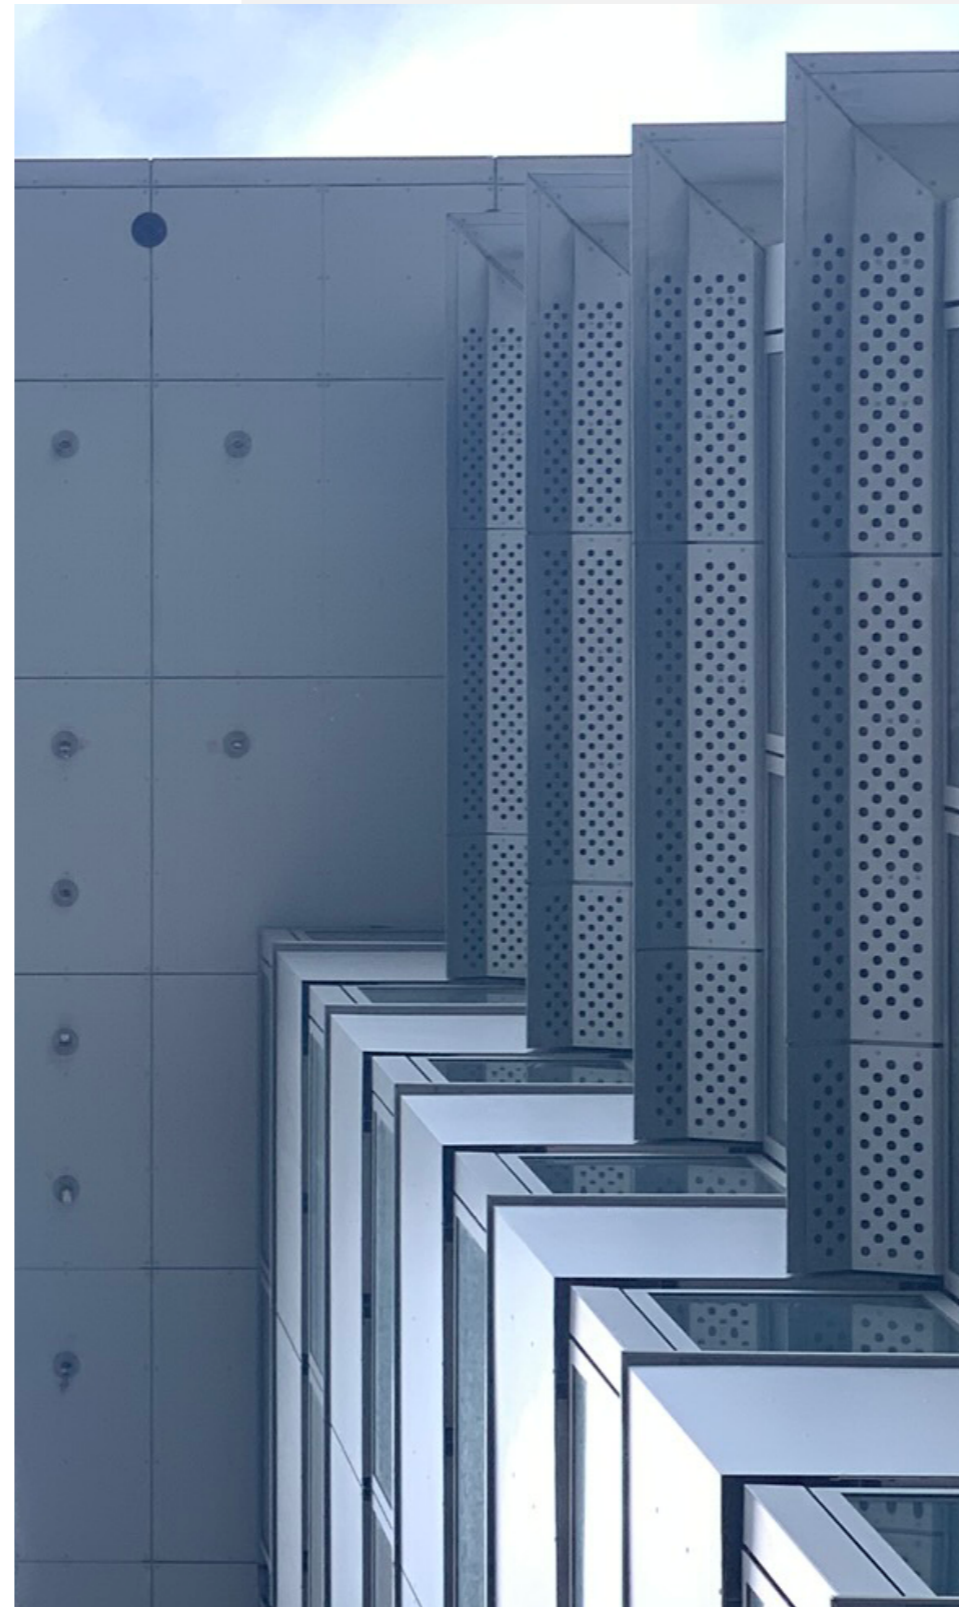

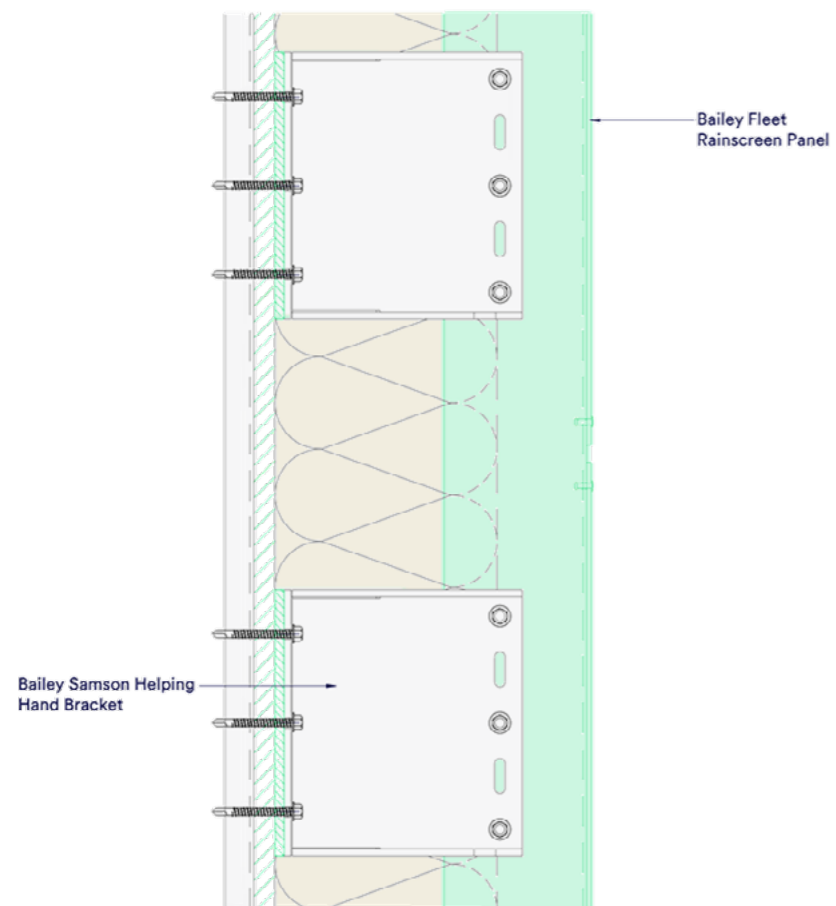

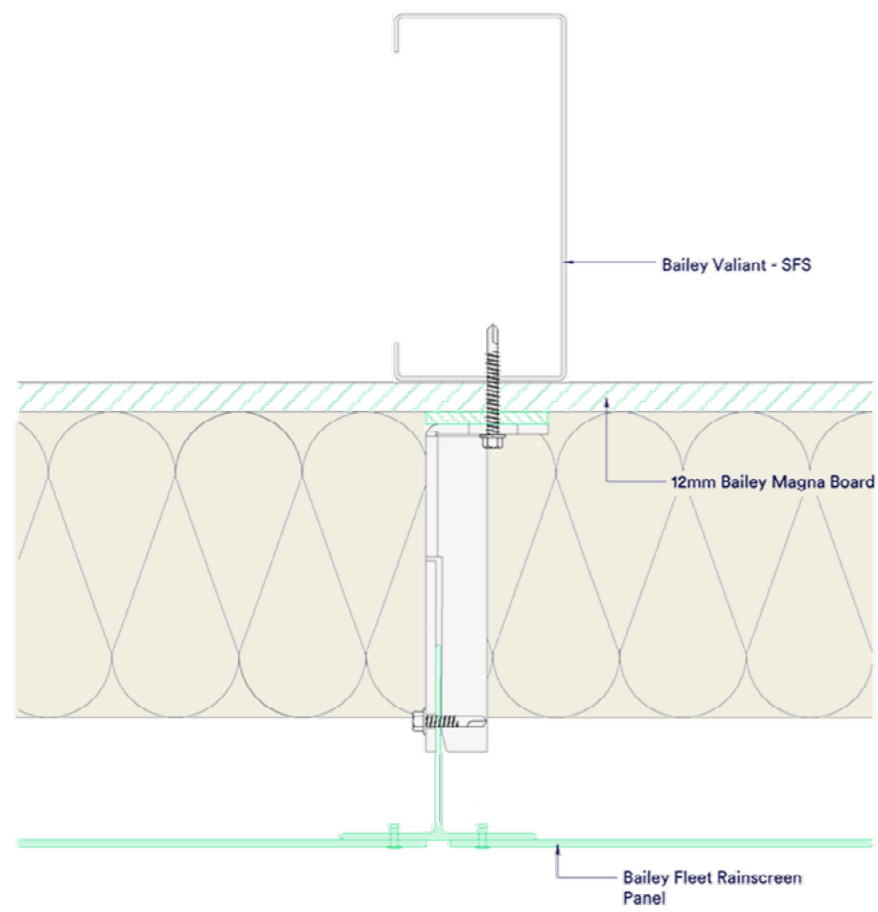

Simple design with profiled panels cut to size. Flat panels fixed directly to subgrid. Face fixed. No folding required on panels.

The Bailey Fleet™ Rainscreen System is a cost effective cladding system that can be applied to a wide range of sizes and materials. It has the flexibility to remain entirely flat or to gently curve around a building's contours with relative ease. Its simple design allows the fastest possible installation and a crisp finish.

Benefits and features

- Design and manufacture time can be reduced due to simplicity
- Easy to install system
- Most lightweight in our rainscreen range
- Panel removal is also quick making panels easy to replace and without the need for 3D parts
- Takes up a fraction of the site space of a folded system

Uses and boundaries

Direct replacement for the fire remediation projects.

Installation / application

Quick installation as panels can be moved easily around the site, stored with a small footprint and fitting is fast and effective.

Storage

Panels are stacked flat onto one another making damage less likely and storage space more efficient.

Sustainability

Lowest carbon footprint of all of the rainscreen range due to reduced manufacture, pallets and packaging, and deliveries.

Associated products

Used in conjunction with Bailey Samson® Bailey Samson® Helping Hand Brackets.

Services

- Level 1,2,3 design services and early project collaboration
- PCSA agreements
- Structural calculations available
- Wind loading calculations available
- Project fixings (including in-house powder coated heads) calculation and supply available
- Project samples available
