

## LAKQ U2 (Patented)

Industrial lock

- Easy left or right changing of the self-latching bolt
- Throw of 25 mm in 1 turn of the key
- Key-operated day bolt
- Adjustment of the bolts up to 20 mm continuous without removing the lockbox
- 4-hole fixing with two hexagon socket head screws
- Centre distance bolts: 60 mm

### ▶ Product Description

Industrial lock with aluminium housing and stainless steel mechanism. We advise this lock as a standard for all your industrial gates. The 20 mm continuous adjustability of the bolts allows a perfect alignment of your locking mechanism. A massive stainless steel throw of 25 mm guarantees a secure locking. Standard supplied with aluminium handle pair.
