

BAFWorks®

Total Control at Your Fingertips

When it comes to running your facility you are the master of your domain. Let BAFWorks® be your secret confidant, using our cutting-edge control system for automated or independent control with a simple tap of the finger.

BAFWorks is your all-in-one lights, ventilation and Big Ass Fans® controller, eliminating the need for individual controls. This intuitive control system integrates with all Big Ass Solutions technologies, as well as existing building equipment, streamlining operations and allowing you to maximize efficiency and comfort. Our award-winning software adds advanced features such as scheduling, grouping and lockout capabilities as well as proprietary algorithms for SmartSense and IntelliVent™.

BAFWorks is a simple-to-use, economical building control system that gives you the power to reduce operating expenses and improve comfort, while simplifying your life.

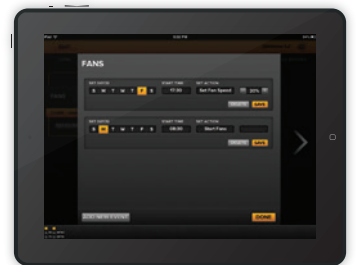

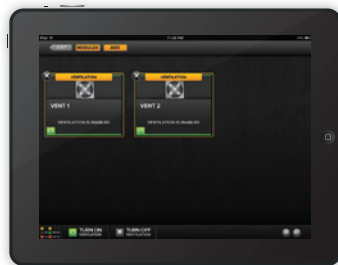

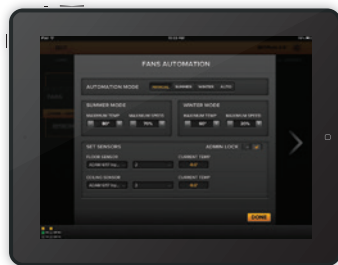

AUTOMATION MODULES

SmartSense - Hands-Free Fan Control

SmartSense takes human error out of fan operation by telling your Big Ass Fans what to do in each season. **Winter Mode** automatically adjusts the fan's speed to minimize the temperature differential between the floor and ceiling. **Summer Mode** automatically increases fan speed as the floor level temperature rises.

Night-Flush with IntelliVent

IntelliVent uses temperature sensors to monitor the outdoor temperature and the indoor floor temperature to automatically open and close or start and stop louvers and ventilation equipment to maintain your specific temperature setting.

Features	
Model	BAFWorks®3.0
Dimensions (in housing)	7.81 x 11.88 in.
Compatible products	Powerfoil®X2.0 Powerfoil 8 Basic 6™ Pivot™ Big Ass High Bay LED Third party ventilation Third party lighting
Max. number of equipment nodes (individual)	32
Max. number of groups	Unlimited
Connections	Modbus cable - fans Ethernet (required for scheduling) - fans, lights and ventilation WiFi router
Controller features	FANS: On/off Speed Scheduling SmartSense Grouping
	VENTILATION: On/off Scheduling IntelliVent™ Grouping
	LIGHTS: On/off Scheduling Grouping
