

The world's first  
antimicrobial  
PVC cladding.

Proven to reduce  
bacteria by 99.99%

changing the face of cladding

The modern alternative to tiles.

The world's first antimicrobial PVC wall cladding with BioCote.

BioClad has an antimicrobial additive impregnated throughout the panels at the time of manufacture. This helps stop the growth of bacteria and mould and works continuously for the lifetime of the panels.

As well as reduced manufacturing and installation costs, hygienic cladding has far fewer joints so less area for water to penetrate and cause failure unlike tiles. Hygienic cladding has been shown to have better impact & stain resistance than traditional tiling. There's low water vapour transmission so no penetration of damaged surfaces or grout.

BioClad is an additional line of defence to inhibit growth of MRSA, E.Coli, Salmonella & mould by up to 99.9%

- Stops growth 24/7
- Inhibits bacteria
- Carries lifetime guarantee
- Reduces HCAI's
- Reduces manufacturing costs
- Reduces installation costs
- No aggressive cleaning fluids
- Works in all kinds of areas

Stylish.  
Hygienic.  
Design Freedom.

Get Vivid.

The Vivid Colour Range is a bright and dynamic cladding system that has been created to enhance your environment. The bold colours have been chosen to add vibrancy to shops, bars & restaurants for a finish that is stylish, durable, watertight & easy to clean.

Vivid is available in bespoke & brand colours to complement a corporate brand and create atmosphere whether used as a feature wall or fitted throughout. Vivid allows you to create a designer look whilst keeping the benefits of hygienic wall cladding over ceramic tiling.

- Bright and dynamic cladding
- Add vibrancy
- Durable
- Watertight
- Easy to Clean
- Bespoke and Brand colours
- LRV's available on request
- Works in all kinds of areas

## The BioClad Premier Installer Network

To ensure quality and competitiveness, BioClad have a national network of independent installers able to deliver incredibly competitive services.

BioClad Premier Installers are trained and accredited by BioClad to adhere to the highest standards in supply and installation and receive continued training and support to ensure customer satisfaction.

## BioClad Overseas Network
