Bespoke Designs

Mitred Lintel

Our Mitred Lintel (also known as Welded Corner Lintel) enables the appearance of an unspoiled window opening on two perpendicular walls of a room. We offer a bespoke design service for Mitred and Bay lintels to suit any angle, load or application. Mitred lintels can be bolted or welded together, and are customizable to each customer's needs. A full set of architectural drawings must be submitted to our Technical Department with each enquiry.
