

BITUCHEM BUILDING PRODUCTS LTD

TECHNICAL DATA SHEET

Bitutack 55

GENERAL INFORMATION

Principally used to give an adhesive bond between bituminous layers. Other miscellaneous uses include; patching, sealing and formation of sub-base, blowing sand stabilisation, hydra seeding and grass growth.

Can be provided in bulk, 200kg drums or 25kg containers

A cationic bitumen emulsion to EN13808 2005 C55B4

Rate of spread guidelines are given in BS EN 594987

CHARACTERISTICS

Requirement	Selected classes from Table 3
Particle Polarity	Positive – Class 2
Breaking Value	70 – 130 – Class 4
Binder Content	≥ 53 Class 4

BINDER TEST RESULTS

Requirement	Selected Classes from Table 4
Penetration	≤ 220 Class 5
Softening Point	≥ 35 Class 6
