

Memo

Perfecting motion 

Additional stability for wider drawers

New: Side stabilisation for TANDEM

This optional accessory to the proven TANDEM runner system will provide increased side stability when opening & closing wooden drawers.

Increased stability with smooth action

- Ideal addition for wide pull-outs with short nominal lengths
- Optional additional part
- No additional drawer or cabinet assembly required
- Concealed behind the drawer invisible to the furniture user
- Smooth running action - despite the side stabilisation
- Low runner noises
- Can be combined with all TANDEM runners

i

Please note:

- Additional 3mm space required under runner
- NL + 15 mm space requirement for internal cabinet depth
- Not compatible with the TIP-ON mechanical opening support system
