

Reliable opening ...

Even wide drawers and pull-outs can be opened with just a light touch – No matter where you press on the handle-less front. The new synchronisation for TIP-ON for TANDEM, the mechanical opening support system from Blum, makes it all possible.

... even for wide fronts

This ensures secure triggering anywhere on the entire furniture front. We recommend synchronisation for drawers and pull-outs with a cabinet width 600 mm and higher.

Something's going on under this drawer ...

... with the new synchronisation for TIP-ON for TANDEM

Almost invisible Yet totally effective

TIP-ON is an inspiration due to its unique ability to open and close handle-less furniture. The new synchronisation feature gives you even more outstanding advantages:

- Now even wide fronts open reliably and close securely.
- The two-sided synchronised locking mechanism ensures a uniform front gap over the entire cabinet width.
- No additional work is required on drawer or cabinet.
- And there is also no additional space required in the cabinet depth.
- All components can be attached quickly and tool-free.
- One version of synchronisation can be used for the entire TIP-ON programme (full and single extensions).

Order specification

<p>1</p> 	<p>TIP-ON unit incl. latch and depth adjuster (l/r)</p> <table border="1"> <tbody> <tr> <td>For single extension 550H</td> <td>T55.1150S</td> </tr> <tr> <td>For single extension 551H</td> <td>T55.3150S</td> </tr> <tr> <td>For full extension 56xH</td> <td>T55.7150S</td> </tr> <tr> <td>S = suitable for synchronisation</td> <td></td> </tr> </tbody> </table>	For single extension 550H	T55.1150S	For single extension 551H	T55.3150S	For full extension 56xH	T55.7150S	S = suitable for synchronisation
