

## EdgeWRAP

Pick Systems and equipment within industrial buildings present many safety issues for personnel moving in and around equipment. It is therefore necessary to protect personnel from head and limb clashes with sharp and sometimes dangerous steel edges.

EdgeWRAP is a Polyurethane Foam self adhesive edge protection that will highlight these hazards and also cushion upon personnel clash/impact. Typically anything below 2100mm in height in personnel routes will require this protection to mitigate the risk of injury.

## Product Features

Protect pedestrians from injury to heads and limbs, as well as snagging of clothing on sharp steelwork

Protect corners from damage

Light duty (LD) foam edge and corner protection

Quick and easy to install with self adhesive strip

Available in 5 shape options

## Technical Details

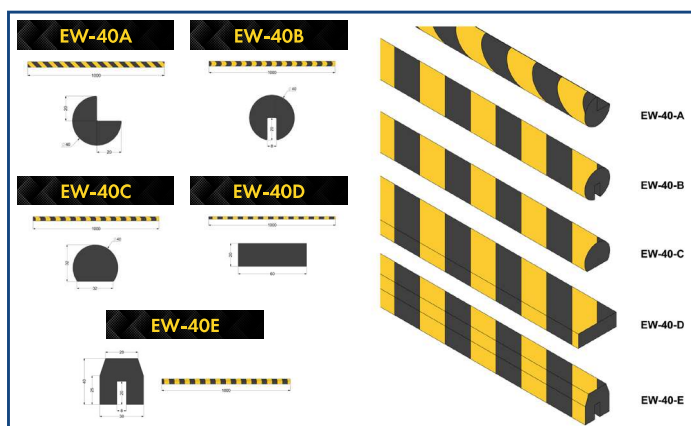

Highly visible black and yellow in colour

3M self-adhesive strips for swift installation (will affix to most surfaces (steel, coated wood etc)

Supplied in 1M lengths and can be cut/mitred on site using sharp knife / fine saw

Fire Tested/Approved to DIN 4102 B2

## Product Specification

Material	Polyurethane Foam
Recycling group	PU/7
Colour	Black & Yellow Chevron
Length	1000mm
Options	5 shapes
Fixings	3m Self Adhesive Strips (incorporated within the product)
