

Coloured Decorative Aggregates

Brett offers a comprehensive range of specialized aggregates (gravels, pebbles, slate, granite, cobblestone and marble) tailored to project requirements.

These aggregates provide specifiers, developers, landscape architects and manufacturers with a choice of outstanding finishes and products for a wide variety of applications.

Brett Landscaping also offer a wide range of aggregates which are suitable for use in both resin bonded or resin bound applications and can be either colour coated or naturally coloured depending upon project requirements.

When using colour coated aggregates we are able to offer virtually any colour to match the closest BS, RAL or Pantone reference to match the required corporate or brand colours.

Design service available which can also help to source or manufacture materials to meet specific applications or designs and ensure that they are dried and screened to meet specific grading requirements Additional help to liaise with a network of approved installers is also available.
