Health Care

The Health Care cubicle has been specifically designed to meet the needs of NHS trusts and private health organisations. It has also been further developed to assist private companies in meeting the obligations laid down in the Disability Discrimination Act (DDA).

The Health Care cubicles aren't just an enlarged cubicle that facilitates easy access for disabled persons, they offer much more than the obvious benefits.

Materials

In a choice of three materials and up to 30 plain and patterned colours;

- Melamine Faced Chipboard (MFC)
- High Pressure Laminate (HPL)
- Solid Grade Compact Laminate

Antimicrobial fittings

Anti-microbial fittings that assist in keeping the washroom environment free of infectious germs by inhibiting the growth of bacteria and mould.

The fittings coating has been evaluated versus the Japanese Industrial Standard JIS Z2801:2000 and exhibited a minimum of 90% reduction in bacterial population, classified as "microbiological results satisfactory" where testing has been performed independently by competent external laboratories.

The bacteria tested were: *Listeria monocytogenes*
Escheria coli 0157 *Salmonella enteritidis*
Staphylococcus aureus (resistant strain) *Bacillus subtilis*
Pseudomonas auruginosa *Salmonella typhimurium*
Streptococcus faecalis *Legionella pneumophila*
Vibrio parahaemolyticus *Enterobacter aerogenes*.

In addition to the anti-microbial benefits, the healthcare cubicle can be manufactured with contrasting coloured partitions, fascias, doors and edges to assist the visually impaired.

The cubicle fittings are in a wide range of designs and colours which can include (as an option) document M pack rails and supports etc.

The Healthcare cubicle range can be manufactured in any of three core material options to suit your budget.

Specification

- 19mm Melamine Faced Chipboard (MFC).
- High Pressure Laminate (HPL) bonded to 16mm moisture resistant chipboard.
- 13mm Compact Grade solid laminate.

The Healthcare cubicle range will assist any organisation both public and private to meet the needs of the Disability Discrimination Act and other relevant washroom requirements at a reasonable cost.

Sport Cubicles

The Sport range of cubicles was developed specifically for gymnasiums, athletic clubs and sports arenas. The Sport range will provide a cost-effective solution for washrooms that have to suffer a bit more wear and tear than average.

The Sport range of cubicles comprises the following models and materials, in up to 27 plain and patterned colours:

- Sport Sprint - Melamine Faced Chipboard (MFC)
- Sport Athletic - High Pressure Laminate (HPL)
- Sport Challenge - Solid Grade Compact Laminate

Sport Sprint

The Sprint model is geared toward the sports loving early and pre-teen, it is manufactured using 19mm Melamine Faced Chipboard (MFC). It has a choice of 27 optional colours and a wide choice of fittings. It is sufficiently robust to take the odd knock from a boisterous youngster and it utilises fittings that are free of sharp edges. The Sprint has a wide choice of powder coated fitting colours as well as Satin Anodised aluminium.

Specification

- 19mm thick Melamine Faced Chipboard (MFC).
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicle sizes to suit customer specifications.

Sport Athletic

The Athletic model is manufactured using High Pressure Laminate (HPL) on moisture resistant 16mm chipboard. This is a robust cubicle that gives

Academy Cubicles

The Academy range of cubicles has been developed to provide washroom facilities that do not break the school or college budget. They are competitively priced to make them affordable to all schools and colleges, local authority controlled or independent. The Academy range offers a washroom cubicle that meets the needs of all age groups, conforms to national standards and is able to fulfil the requirements of the Disabilities Discrimination Act (DDA).

The three models within the Academy range are;

- Fresher - Melamine Faced Chipboard (MFC)
- Prefect - High Pressure Laminate (HPL)
- Student - Solid Grade Compact Laminate (SGCL)

Materials

In a choice of three materials and up to 30 plain and patterned colours;

Academy Fresher

The least expensive of the Academy range, the Fresher is manufactured using MFC with a choice of Satin Anodised or powder coated fittings.

The Fresher provides a low cost high quality washroom cubicle that is an ideal choice where the school or college budget is limited. The Fresher has a choice of over 27 plain and patterned colours for the doors, fascias and partitions allowing compatibility with a wide range of washroom designs.

With the Fresher you don't have to sacrifice quality for price.

Specification

- 19mm thick Melamine Faced Chipboard (MFC).
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicles to suit customer specifications.

Whatever the requirements, Bridgman IBC can provide a washroom solution for the customer.

Academy Prefect

The Prefect cubicle offers that extra touch of quality and strength to cope with the wear and tear presented by the older school and college student.

Manufactured using 'High Pressure Laminate', the Prefect offers an extensive colour range for cubicles and associated fittings.

The Prefect combines a robust construction with stylish materials that present an excellent functional design.

Academy Cubicles

Specification

- 16mm thick HPL-faced chipboard.
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicle sizes to suit customer specifications.

Academy Student

The Academy Student cubicle is an exceptional product that can meet the needs of any washroom environment. It is manufactured using a Solid Grade laminate that provides long lasting functionality. The Student cubicle is especially suited to wetroom and shower environments. The laminate finish and phenolic resin core will not absorb moisture or degrade through regular use in showers.

Specification

- 12mm thick solid grade laminate.
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicle sizes to suit customer specification.

BRIDGMAN IBC LTD

Platinum

The Bridgman Platinum range of cubicles is a unique combination of Styling and functionality. It is the ideal choice for the executive washroom, it provides a model to suit the most elegant of facilities including office and business environments.

The three models within the Platinum range are:

- Accord
- Premier
- Summit

Materials

In a choice of 3 materials and up to 30 plain and patterned colours;

Melamine Faced Laminate (MFC)

High Pressure Laminate (HPL)

Solid Grade Compact Laminate

PLATINUM ACCORD

The Accord cubicle is manufactured using 19mm Melamine Faced Chipboard (MFC) with a choice of 12 partition and door colour options. All partitions and doors are edged with a 2mm thick PVC coloured trim.

The Accord model also incorporates stylish aluminium fascias and pilasters. The fascias and pilasters have a number of compatible colour options (see colour chart) including a textured antique silver finish.

The Accord is also supplied with matching colour fittings that compliment the stylish look of the cubicle presentation.

SPECIFICATION

18mm thick Melamine Faced Chipboard (MFC).

Aluminium polyester powder coated fittings or satin anodised aluminium.

Cubicles sizes to suit customer specifications.

PLATINUM PREMIER

The Premier cubicle is manufactured using 16mm moisture resistant chipboard bonded to a high-pressure laminate. It has a very wide range of colour choices to suit just about every design environment. The partitions, doors and fittings can be supplied in compatible colour schemes. All partitions and doors are edged with laminate to maintain colour consistency on all surfaces.

Combined with the aluminium fascias and pilasters, the high-pressure laminate finish provides a resilient surface and an extra element of quality that enhances the stylish appeal of the Premier cubicle.

SPECIFICATION

High pressure laminate bonded to 16mm thick chipboard

Aluminium polyester powder coated fittings or satin anodised aluminium.

Cubicles sizes to suit customer specifications.

All edges covered by 2mm PVC trim

PLATINUM SUMMIT

The Summit is the most robust and stylish model within the Platinum range of cubicles. Like all of the Platinum range it comes with aluminium fascias and pilasters as standard. It also has a wide range colour options for the fittings, doors and partitions.

The Summit is manufactured using 13mm solid grade laminate, which provides excellent mechanical properties. It is the strongest and most robust of the cubicle ranges, it is ideal for shower and wet room environments and is used extensively in public buildings and office environments.

The solid grade laminate has a phenolic core, which is black in colour; consequently it does not utilise edging materials. The edges of the doors and partitions are shaped to a radius profile.

The Summit is a long-lasting and very stylish cubicle that combines toughness and high quality.

SPECIFICATION

12mm thick solid grade laminate with rounded edges.

Aluminium polyester powder coated fittings or satin anodised aluminium.

Cubicles sizes to suit customer specifications.

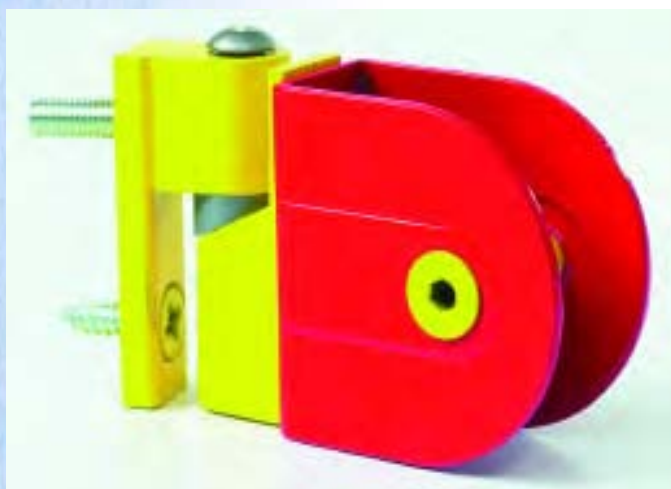

Chidsafe Toilet Cubicles

The Bridgman IBC Chidsafe range of cubicles is an innovative and child friendly range of products that enhance the school washroom environment. Specifically designed to meet the needs of children whether they are Sure Start toddlers or Primary school pupils.

The three models in the Chidsafe range come in a choice of three materials and up to 30 plain and patterned colours;

- Chidsafe - Melamine Faced Chipboard (MFC)
- Chidsafe Plus - High Pressure Laminate (HPL)
- Chidsafe Longlife - Solid Grade Compact Laminate (SGCL)

Chidsafe

This is the standard lowest cost product within the Chidsafe range. It is manufactured using 19mm thick Melamine Faced Chipboard (MFC) and has a choice of 27 colours. Also used are easy function slide bolt door locks, which can be easily opened by reaching over the door. Where cubicle height prevents this, a coin release screw allows opening from the outside. A 2mm thick PVC trim covers all edges.

Specification

- 19mm thick Melamine Faced Chipboard (MFC).
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicle sizes to suit customer specifications.

Chidsafe Plus

The Chidsafe Plus cubicle offers the same optional choices as the Chidsafe cubicle but it is manufactured using different materials.

The Chidsafe Plus cubicle is manufactured from 16mm moisture resistant chipboard, which is covered by a robust high-pressure laminate and is also available in an extensive range of colours.

Specification

- High pressure laminate bonded to 16mm thick chipboard core.
- Aluminium polyester powder coated fittings or satin anodised aluminium.

- Cubicle sizes to suit customer specifications.
- All edges covered by 2mm PVC trim.

Additional options include:

- Stylish profiled top edges on the doors and/or divide partitions.
- Specifying cubicle heights up to a maximum of 1.96M high (including leg supports).
- Multi or plain colour fittings including the option of a 'Clowns Face' indicator bolt.
- Document M packs are also available to suit cubicles required for disabled persons.

Chidsafe Toilet Cubicles

Chidsafe Longlife

The Longlife cubicle is the most robust in the Chidsafe range.

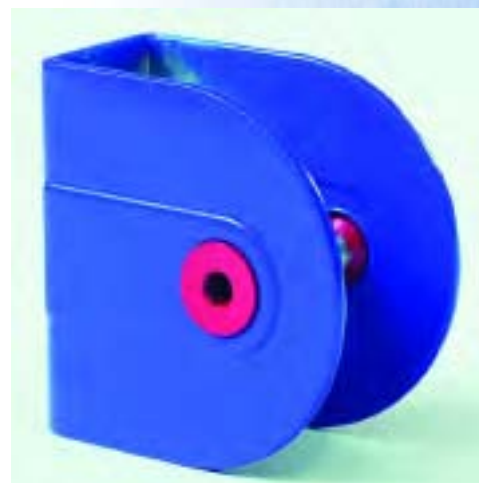

It is manufactured using a 13mm thick solid grade laminate, which is specifically designed to take a lot of wear and tear. It is also the primary material used in 'Wet Room' and shower environments.

The leading edges are finished to a smooth radius to ensure that no sharp edges are present. Chidsafe Longlife can also be manufactured to suit the sizes the customer needs and have the stylish profiled top edges on doors and partitions.

Specification

- 12mm thick solid grade laminate with round edges.
- Aluminium polyester powder coated fittings or satin anodised aluminium.
- Cubicle sizes to suit customer specifications.

Duct Panelling & Vanity Units

Bridgman IBC also supplies a variety of vanity units.

These are manufactured to customer size specifications and colours to match toilet cubicle and duct panelling installations.

The combination of vanity units and duct panelling provide a very stylish and attractive washroom presentation.

The vanity units and duct panels can be manufactured using 3 core materials which are:

- Melamine Faced Chipboard (MFC) which incorporates a HPL post-formed top surface.
- High Pressure Laminate (HPL) bonded to moisture resistant chipboard.
- Solid Grade Laminate incorporating a post-formed top surface.

Whether your need is for a large toilet block, shower facility or a small enclosed space, we can supply the duct panelling and vanity units to the size and design that you need.

All access panels are supported by concealed

fittings that permit easy access whilst maintaining continuity of the the design.

The combination of materials and colours provided by Bridgman IBC helps ensure that the needs of architects, designers, local authorities and builders can be met in full.

Speedwall 2

MATCHING VANITY UNITS

Vanity unit tops are made from 20mm postformed laminate. The front ends and access panels are 19mm MFC with a 3mm PVC edge. All are available in finishes to match or complement the cubicles.

Tops incorporate an upstand and downstand and are available, made to order, in 2.5m maximum lengths to incorporate your own choice of sink bowl. Lengths over 2.5m are supplied in two sections.

Lighting pelmets in matching laminate can be supplied.

ANTI-VANDAL, MAXIMUM STRENGTH FITTINGS

CHANNEL BRACKETS – suitable for all fixing points. Supplied with flush-through fasteners in matching finish.

HINGE SYSTEMS – fully adjustable for left or right hanging doors, with simple fall open/fall closed mechanism. Features heavy duty channel reinforcing brackets to prevent 'edge burst' through prolonged misuse or vandalism.

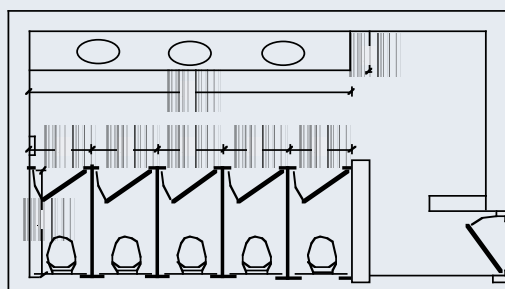

PEDESTAL LEGS – adjustable 140-170mm floor clearance, features double 'T' nut for superior strength.

INDICATOR BOLTS – pre-drilled with concealed fixing screws, trouble-free action and positive emergency opening facility.

ANTI-TAMPER BAND SCREWS – available on all fittings.

ACCESSORIES – including lockable toilet roll holders and coat hooks.

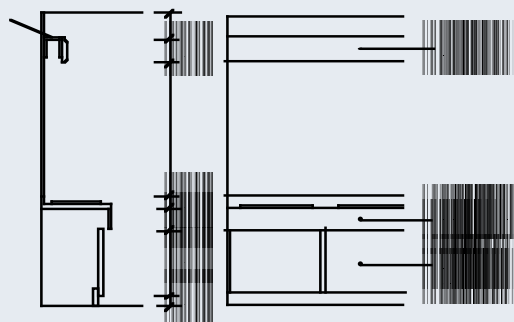

COLOUR CHOICE – all fittings are available in black textured powder coating as standard. Other colours are available on request.

Speedfit off-the-shelf cubicles

THE UPGRADED, COST-EFFECTIVE CUBICLE SYSTEM AVAILABLE FROM STOCKISTS NATIONWIDE

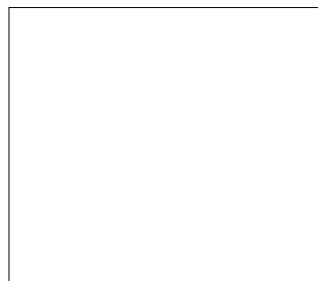

Speedfit from Bridgman IBC is a proven, budget-priced cubicle system, with all components flat-packed and available off-the-shelf at merchants throughout the U.K. Now upgraded to include new, harder-working, anti-vandal fittings and

accessories, Speedfit delivers even better performance in a variety of installations. Both Speedfit and Speedfit Select are ideal for all areas except those subject to very heavy traffic or constant wet and humidity - (Bridgman IBC Compact Grade is the product to choose here).

Constructed from 19mm MFC (melamine faced high density chipboard), with 1mm PVC panel lipping, Speedfit offers reliable and robust performance in many commercial, leisure and public environments.

With a choice of two standard unit colours - Pure White or Concord, all cubicles are made to measure - depth 1500-1800mm. Doors can be supplied inward or outward opening, to hang left or right. Special sizes and disabled doors can be manufactured to order.

Bridgman IBC will also produce Speedfit and Speedfit Select cubicle systems in non-standard colours and special designs to order.

Speedfit Select

ADDED FASCIA COLOUR RANGE FOR MORE STYLISH DESIGNS

Contractors and specifiers used to expect less choice and quality at the budget end of the cubicle market. Not any more.

New Speedfit Select features the same upgraded fittings and standard unit colours as Speedfit. But an additional range of six fascia panel colours allows customers to create more individual washroom designs. Such design opportunities are usually reserved for top of the range systems, now they can be achieved at a fraction of the price.

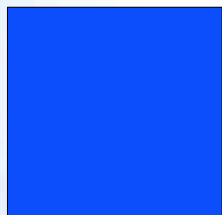

Readily available at stockists nationwide, Speedfit Select new colour fascias are constructed from 18mm postformed, Formica laminate faced chipboard. For expert technical advice, design guidance, project support or special orders please contact Bridgman IBC Cubicle Sales on 01429 221111.

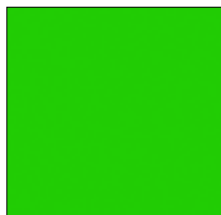

WITH NEW ADDED COLOUR CHOICE

Rouge Cerise R036

Bleu Caraibes B086

Vert Palme V023

Cosmic Vert C031

Maryland Fonce M003

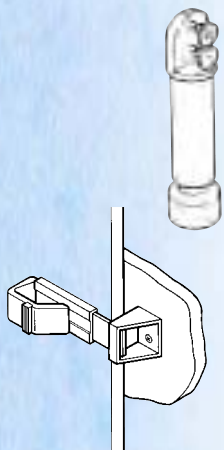

Cosmic Beige C030

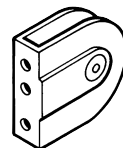

Every effort has been made to achieve faithful colour and pattern representations, but due to printing limitations we recommend that samples of actual material are requested prior to specification.

New harder working fittings and accessories

Top of the range, maximum strength, anti-vandal fittings are now available in black for Speedfit Select and in anodised aluminium for Speedfit. All fittings are supplied with screws and plugs shrink wrapped for convenience. A full range of accessories - lockable toilet roll holders, headrails, coat hooks, etc - are also available.

- **Pedestal legs** – adjustable 140-170mm floor clearance, features double 'T' nut for superior strength.
- **Indicator bolts** – pre-drilled with concealed fixing screws, trouble-free action and positive emergency opening facility.

- **Channel Brackets** – suitable for both wall and pilaster fixing, the bracket is supplied with flush through fasteners. An angle bracket version is also available.

- **Hinge systems** – fully adjustable for left or right hanging doors with simple fall open, fall closed mechanism. With heavy duty channel reinforcing brackets to prevent 'edge burst' through prolonged misuse or vandalism.

Compact Grade Cubicles

FOR LASTING STRENGTH AND PERFORMANCE IN THE TOUGHEST ENVIRONMENTS

Bridgman IBC Compact Grade cubicles are designed for locations subject to heavy use, constant wet and humidity, and areas prone to vandalism. With unbeatable strength and durability, Compact Grade is the specifier's high performance choice for the most demanding environments.

COMPACT GRADE - MADE FOR THE DEMANDS OF THE DAY

Bridgman IBC Compact Grade cubicles are manufactured from 12mm solid laminate. Edges may be cut square, bevelled or polished, to provide panels that are safe, hygienic, and extremely tough and longlasting.

Available in a range of standard size panels and doors, as well as special wider sizes for disabled cubicles and reduced frontal designs for primary schools.

Moisture resistant

Compact Grade offers excellent water resistance and humidity resistance properties and is therefore ideal for areas which have prolonged contact with water. It does not degrade where water is constantly present and can be cleaned with high pressure hoses. Ideal for swimming pool or leisure centre changing rooms.

Durability

Especially designed for applications on horizontal or vertical surfaces where mechanical strength, impact resistance and minimal maintenance is required. Excellent protection to give long lasting performance in hard working, high use washroom environments and heavy traffic areas. Ideal for public houses, nightclubs, hotels and industrial, prison and public sector usage.

Heat resistant

Compact Grade offers excellent thermal properties and is resistant to heat and cigarette burns which prevents casual abuse and vandalism; excellent fire-retardant qualities.

Impervious to bacteria and fungi

Ideal for areas such as hospitals, abattoirs, food process factories and laboratories where safety, hygiene and toughness are important.

Chemical resistant

Excellent resistance against a range of common chemicals and all cleaning solutions used in wet areas.

Prolonged contact with acid based ceramic cleaners and limescale removers can cause permanent staining. Any such spillage or splashes must, therefore, be washed off immediately.

CHOICE AND SERVICE FOR ANY SIZE PROJECT

Whether new build or refurbishment, one cubicle or full washroom and changing facilities - simply send Bridgman IBC your requirements, or ask for a representative to call, and we'll put together a complete, cost-effective Compact Grade solution.

Complementary products - complete range of colour matched vanity systems, brown seating, ducting, wall panels and column cladding.

An extensive colour choice - twenty standard plain colours including custom pattern finishes - please refer to separate colour selector.

Customer service - Bridgman IBC provides a fast, professional support service including full technical advice during and after installation. We are always on hand to discuss your needs and help with exact lead times for your project. Bridgman IBC will offer the best possible delivery to meet all our customers' requirements.

Compact Grade Cubicles

MAINTENANCE AND CLEANING

Compact Grade does not easily scratch or chip and will withstand normal wear and tear. Surfaces should be kept clean by using water and a mild detergent. Non-scratch liquid, creams and pastes can be used to remove ball pen, pencil and indelible pen marks. After cleaning, the surface should be washed thoroughly with clean water and dried with a soft cloth. Furniture polishes should not be used as they can result in a build up of wax or silicone on the surface which may lead to discoloration. Cumulative staining over a prolonged period can usually be removed by a diluted solution of household bleach.

SWIMMING POOLS

LEISURE / SPORTS CENTRES

PUBLIC HOUSES / NIGHTCLUBS

SCHOOLS / YOUTH CLUBS

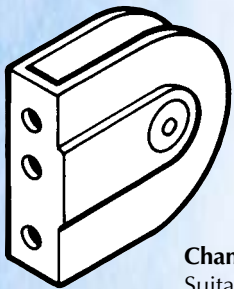

PRISONS / PENAL CENTRES

HOSPITALS / HOTELS

ABATTOIRS / FACTORIES

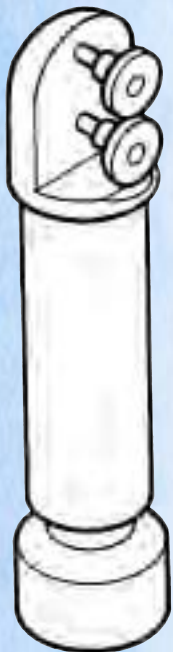

HARD WORKING FITTINGS AND ACCESSORIES

A range of maximum strength, anti-vandal fittings, specially designed for Compact Grade, are available:

Channel Brackets

Suitable for both wall and pilaster fixing, the bracket is supplied with flush through fasteners in matching finish. An angle bracket version is also available.

Pedestal legs

Adjustable 140-170mm floor clearance, features double 'T' nut for superior strength.

Full range of accessories

Lockable toilet roll holders, headrails (extruded aluminium in satin anodised or powder coated matching finish), coat hooks, shower curtain tracks etc.

Standard light or dark finishes

Available in three standard finishes:

- Polished and anodised
- White powder coated
- Dark textured powder coated

Anti-tamper screws

Hinge Systems

Fully adjustable for left or right hanging doors with simple fall open, fall closed mechanism. With heavy duty channel reinforcing brackets to prevent 'edge burst' through prolonged misuse or vandalism.

Bridgman IBC

Doors & Doorsets

QUALITY PERFORMANCE AT AN AFFORDABLE PRICE

Bridgman IBC take the problems out of door specification. Simply let us know your requirements, and we are able to manufacture to order. That means a door delivered in your choice of facing - veneered, laminated or primed for internal painting, with a certified fire rating, factory glazed to your design, and prepared for your lock fitting if required.

BUILT-IN BENEFITS

What's more, our technical staff are on hand to provide expert specification advice concerning the selection of all components and materials. We also provide design support to ensure your doors are co-ordinated with the interior design of your project.

Reduced on-site costs - Selecting Bridgman IBC Doors not only saves on-site joinery time and

labour costs, it also means faster, easier installation because we manufacture to correct tolerances.

Quality assured - Bridgman IBC Doors meet all relevant British Standards and offer guaranteed performance. All timbers are to BS 1186 class 1 & 2 with factory controlled moisture content.

Full fire certification - Bridgman IBC supply doors and doorsets with full fire certification up to FD60 to meet the latest British Standards. FD30 and FD60 assessment packages are available to assist you at the design stage.

Environmentally aware - We recognise a responsibility to our customers, staff and suppliers to base our timber purchasing on well managed forests. We require evidence that all wood supplied is from legal sources that are operating in accordance with the laws of the local jurisdiction.

Proven capability across all sectors - Bridgman IBC has a successful track record in the design and manufacture of special doors and fire doors and doorsets for clients in all commercial sectors, such as: Hospitals, Health & Pharmaceutical industries, Retail, Offices, Schools, Hotels, Airports, Sports Stadia and other public buildings - detailed case histories are available on request.

High quality doorset packages - For further cost reduction and interior design integrity Bridgman IBC also manufacture complete doorsets. See the Bridgman IBC Doorset brochure or telephone for further information.

Free technical support & site visits - Technical staff are assigned to each project to provide in-depth design and specification advice to architects, surveyors and contractors. This ensures costs are minimised and delivery schedules are met.

Delivered ready for installation - All elements can arrive together or separate if required and are co-ordinated for on-site fixing. Bridgman IBC manufacture to the correct tolerances to eliminate on-site installation problems.

Bridgman IBC is one of the UK's foremost manufacturers of cubicle systems, special flush door & doorsets.

Established in 1982, we have built a reputation for reliable quality and service, together with a better understanding of our customer needs. We not only meet these needs through our extensive product ranges and project design support but through an experienced team of sales and technical staff who work closely with architects, specifiers, interior designers, shopfitters and construction companies.

Bridgman IBC is committed to total quality, we were the first in the industry to attain BS EN ISO 9002 (2000), and we belong to BM TRADA's door quality assurance programme.

All our products are designed to meet the latest relevant BS, ISO, and NHBC standards as well as current UK Building Regulations, and are supported by guarantees

Special Flush Doors & Doorsets

Bridgman IBC offer an unrivalled choice of special doors with or without vision panels, as well as an extensive range of finishes, plus design support to ensure even the most exacting brief is realised successfully. Fully certified fire doors, and a wide range of matching doorsets are also available. Special sizes, single leaves or pairs, doors with matching overpanels - whatever your needs Bridgman IBC provide the solution, style, protection and price you're looking for.
