# FENCING - MESH SYSTEMS

## AXIS

Axis by Dirickx, no screws or bolts. The panel attaches directly into the purpose made grooves along the full length of the post. Available in crimped & double wire panels with various mesh sizes and diameters.

## CODI

CODI Systems, ideal for perimeter protection and used widely on schools and sports grounds. Examples include:  
CODI 'C' - crimped panel  
CODI 'M' - 6/5/6mm double wire  
CODI 'H' - 8/6/8mm double wire  
rebound panels also available  
CODI 'Z' - striped mesh effect

## 358

Atlas 358 mesh, originally manufactured for use in prisons but now used on various applications involving high risk. Supplied on RHS and Bi-steel posts.

## WELDED MESH ROLLS

Britplas supplies a comprehensive range of roll form welded mesh fencing. Rolls available galvanised and coloured Green or Black together with suitable posts and line wire.

## CHAINLINK

Chainlink systems include light, medium or heavy gauge for general boundary or sports requirements. Examples of posts available include round or square box section and standard angle.

# RAILINGS

## BRITPLAS TYPE

Tubular Bar System with round or square palings and hidden post connections for added security. A well devised system in which the fence line and gates form an attractive but secure boundary.

## BOWTOP

Strong and durable, manufactured from solid bar. Supplied as full fence height or wall mounted, panels can be specified to feature rakes and curves with our design team willing to undertake a full site survey

## CONTINUOUS BAR

Continuous Bar or 'Estate Fencing' has been one of the most popular forms of physical demarcation in parklands, estates and landscaped grounds for over two hundred years.

## AXUR

Available in a range of designs and colours, this self adjusting system flows over ground contours and adapts to slopes up to 20 degrees without the need for stepping.

## BESPOKE VERTICAL BAR

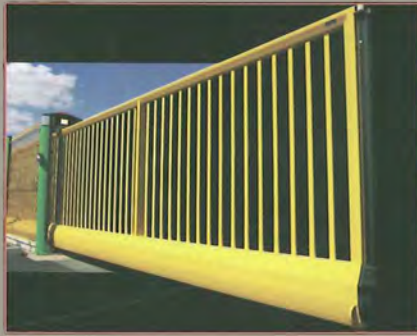

Designed and hand crafted, our 'Ultimate' vertical bar railings are manufactured to last. Working with architects or with the briefest of design remits we can produce a product that will suit all needs.

# GATES & BARRIERS

## SWING GATES

Single and double leaf gates are available in various heights and widths with options on infills to match all of the Britplas mesh and Railing systems. Extensive range of designs from standard pedestrian and vehicle control to purpose made CAD drawn specials.

## SLIDING GATES

Manufactured to suit all types of applications and site conditions e.g. tracked, cantilevered or telescopic where restricted space is an issue. Manual and automated versions are offered whether constructed from steel or aluminium. Again, specially designed bespoke type of gates can be specified and produced.

## TURNSTILES

An increasingly popular method of controlling the flow of people. Half height or full height versions are available with the choice of manual or automated activation.

## RAISING ARM BARRIERS

An attractive method of regulating and controlling traffic, whether manually or allied to a choice of power operated access control options. Support posts are available for barriers with long poles and skirting can be added if desired.

## BOLLARDS

More sensitive site entrances can be protected with bollards, whether static or retractable which can be supplied with manual or automated activation. Illuminated versions are also available.

## BLOCKERS

Road blockers can be used to prevent unwanted vehicle entry on sites demanding a high degree of security. Fully automated for use in areas that are manned or unmanned with entry options including keypad, intercom,

## BESPOKE PRODUCTS

Britplas is renowned for designing and producing high quality architectural metal work. These products range from ornamental arches to security gates. We also specialise in generating bespoke design solutions for a variety of needs and so are able to address any metal works requirements with reliability and efficiency.

## HANDRAILS & STAIRCASES

We supply products for both urban and rural developments including housing estates, hospital infrastructure projects, education estates, local authority inner city rejuvenation and lots more. No job is too large or too small. There are many applications for stairs and hand rails all of which can be accommodated by the Britplas design and manufacturing team. Handrail designs can vary from a cost effective and functional standard panel design to sophisticated spiral design.

## BALCONIES & BALLUSTRADES

Britplas has acquired a reputation for supplying high quality, well constructed, decorative iron work, street furniture, railings and gates. We also have the ability to produce a wide range of balconies & ballustrades. Whether functional or decorative, each project is subject to the same rigorous controls during design and manufacture.
