

Use & Care

If you have searched long and hard for a superior quality, durable and tough material, we would like to congratulate you for choosing HI-MACS[®] Natural Acrylic Stone[™]. The material is hard-wearing, extremely repellent to stains and is therefore very easy to look after. We would like to provide you with a few simple tips and hints for caring for your product so that you can enjoy its exceptional quality for many years to come.

General day-to-day stains

HI-MACS[®] is a completely homogenous material. As it does not have any pores, you can simply and easily clean it with a damp cloth or sponge and a mild detergent. You can also use a domestic scouring agent on all matt finishes. It is also useful to wipe your surface occasionally with a scouring agent or wet sponge to retain the even finish of your product.

Tougher stains

Tougher stains, caused by food colouring, tea or fruit juice can easily be removed using a bleaching agent (do not leave in contact with the work surface for more than five minutes). Clean the surface with a domestic all-purpose cleaner and rinse with clean water. You can also use a scouring agent on matt finishes. Nail varnish can easily be removed with nail varnish remover (acetone-free) or a scouring agent.

Acidic cleaning agents

A number of cleaning agents contain acids, such as methyl chloride or acetone. You should avoid using these on a HI-MACS[®] surface. Should one of these products accidentally come into contact with the material, as a precautionary measure you should rinse the surface with soapy water to prevent any discolouring taking place.

HI-MACS[®] is an ecological material. Its mineral and acrylic composition, environmentally-friendly and virtually "waste-free" manufacturing process give it top marks in terms of "eco-friendliness."

There can be no dirt build up where there are no joints.
HI-MACS[®] can be simply and easily joined seamlessly.

Renowned hotels and restaurants rely on HI-MACS[®] because of its ease of care.
