

Floor Standing Heater Shield Installation Instructions

You will need:

- Pencil
- Drill
- Philips (Crosshead) Screwdriver

n.b. The fixings supplied are suitable for plasterboard walls.

1. Place the guard over the heater ensuring there is an even clearance between the guard and heater on all sides
2. Using a pencil mark off screw hole positions for the guard
3. Place the guard aside then drill and plug the wall where you have marked.
4. Insert screws into the wall plugs leaving a 10mm gap from the wall to the screw head
5. Using the keyhole fixing lugs, hook the electronic heater shield onto the screw and tighten.
