

## Radiator Shield Installation Instructions

## Installation Instructions

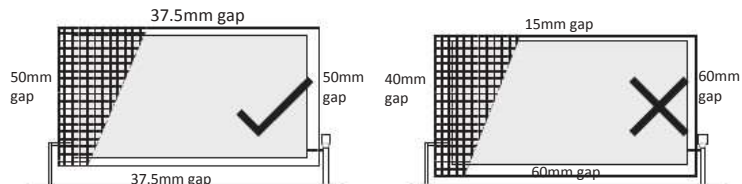

The fixings supplied are suitable for plasterboard walls.

You will need:

- Pencil
- Drill
- Philips (Crosshead) Screwdriver.

### Installing the Radiator Guard

1. Place the guard over the radiator ensuring there is an even clearance around the top and sides of the guard.

2. Using a pencil mark off screw hole positions for the guard

3. Place the guard aside then drill and plug the wall space you have marked.

4. Insert screws into the wall plugs leaving a 10mm gap from the wall to the screw head.

Using the keyhole fixing lugs, hook the radiator guard onto the screw and tighten.
