Advantages:

Easy to install with simple tools, saving time and money
Prevents bicycles from slipping down and blocking pavement
Prevents damage to lighting column from locks or chains
Compact design helps reduce street clutter
Cyclists can secure their bicycle using D-lock instead of chain

Specification:

Weight: 12kg
Dimensions: 500mm diameter ring
Custom bracket to fit any circular or irregular column
New design available for lamp columns with low access panels
Neoprene lining to all brackets to protect lamp column paintwork
Lining helps to

electrically isolate the Cyclehoop from the lamp column

Materials:

Stainless steel 304 grade or mild steel Supplied with stainless steel security nuts Powder coating to custom colours available

Categories: Bicycle Stands, Cyclehoop Products.
