HIGH PERFORMANCE INDUSTRIAL DOORS

INTIMIDATOR

HIGH PERFORMANCE INDUSTRIAL DOORS

Intimidator Industrial Doors represent the most comprehensive range of high security industrial doors, successfully combining maximum performance with **multiple third-party accreditations.**

Providing the most **complete protection** to industrial door applications in any single range of products.

Secured by Design

Police Preferred Specification

Independently tested by the Loss Prevention Certification Board

Intimidator IR1

Certified to LPS 1175
Issue 8, A1 (SR1)
& Secured by Design

Delay: 1 minute
Tool kit A

LPS 1175 Issue 8
Cert. No. 1396d

Intimidator IR2

Certified to LPS 1175
Issue 8, B3 (SR2)
& Secured by Design

Delay: 3 minutes
Tool kit B

LPS 1175 Issue 8
Cert. No. 1396g

Intimidator IR3

Certified to LPS 1175
Issue 8, C5 (SR3)
& Secured by Design

Delay: 5 minutes
Tool kit C

LPS 1175 Issue 8
Cert. No. 1396h

Intimidator IR4

Certified to LPS 1175
Issue 8, D10 (SR4)
& Secured by Design

Delay: 10 minutes
Tool kit D

LPS 1175 Issue 8
Cert. No. 1396i

performance

VERSATILE

Intimidator has a wide range of curtain styles and locking systems, making it a perfect fit for any industrial application.

- ❑ Certified to LPS 1175, A1 through to D10
- ❑ Single skin profiles with optional perforation
- ❑ Double skin profiles with range of insulation materials
- ❑ Excellent thermal and acoustic performances
- ❑ Hurricane wind-load resistance
- ❑ Manual or automatic locking
- ❑ Aluminium, galvanised steel and stainless steel options

APPLICATIONS

Warehouses

Data centres

Government
& defence

APPLICATIONS

Intimidator Industrial doors are used across a broad spectrum of industries.

- Secure and custom bonded warehouses
- Production and manufacturing facilities
- High value logistics depots
- Utilities and communications
- Data Centres
- Government and Defence
- Critical Infrastructure
- Laboratories and Research facilities
- Prison and custodial
- Police and law enforcement

INTIMIDATOR TICKS ALL THE BOXES FOR SECURITY MANUFACTURING FACILITY

For this new-build manufacturing facility, the company required an industrial door solution that would be able to meet multiple demands.

Security was of prime importance due to the high-value materials stored within the building. At the design stage, the Secured by Design standard had been requested, yet the certification to a wide range of LPS1175 ratings allowed the selection of a much higher performance product.

As the only barrier between the variable external temperature and weather conditions, and the required controlled environment within, high-performance thermal insulation was selected. The hurricane wind-load rating of the door, even at these sizes, provided reassurance.

A challenge associated with any large industrial door can be the heat loss when the door is opened. To mitigate against this, an inverter drive motor was selected

to ensure the door opened and closed as quickly as possible. Full safety on close was provided to allow the door to be linked to other building control systems, ensuring successful integration into the operating processes of the company. Auto-locking ensured the door was secure every time it was closed, without the need for an additional locking process.

The aluminium construction of the door meant the same polyester powder coat finish could be applied to the security doors and windows, giving a consistent external look to the building. The company selected an alternative colour for the inside of the door that was more suited to its requirements.

The selection and integration of the Intimidator in this application was a complete success. The product exceeded the requirements of all stakeholders and will continue to do so for many years to come.

Intimidator Industrial Doors are manufactured in the UK by CGT Security
