

## VORTEX + SHUTTERS PROTECT RETAIL **Vortex +**

A bike retailer was needed a solution that could provide a higher level of security against forced entry, but that could do so in a sleek and compact design. Our Vortex + security shutter was the optimal solution for the security and design requirements.

The client was provided with an additional and robust layer of security that enabled them to progress their business with peace of mind.

The installers were supplied a high-quality and easy-to-install product plus our distinguished customer support throughout the entire process.

The Vortex + security shutter not only offers the innovative features of the Vortex range such as a patented lath design that reduces the roll size by 50% and self-locking capability, but additionally offers a certified security standard even for external face fix.

Vortex + Shutters have been independently tested by the Loss Prevention Certification Board and have received certification for LPS 1175 Issue 8 Security Rating B1.
