

Codi 'H' Rebound Fencing System

This robust system is designed to be used where conventional fences fall short of required strength and protection.

A simple to erect fencing system offering a cost effective solution for many security and sports applications. Offering strength, durability and

elegance, Codi 'H' is available in a variety of heights, and is suited to a wide range of applications including commercial, industrial, educational, sports & recreational facilities.

Sizing: Panel mesh is 200mm x 50mm comprising two 8mm horizontal wires and a single 6mm vertical wire. 66mm x 50mm mesh up to 1200mm high.
