At the heart of innovative security solutions for the control of access since 1969

## Gate Locks

### Type 523D

This gate lock is designed for external use on double vehicle gates - electrically released with manual over-ride.

It is designed to accommodate gate drop, and the ramped lead-in ensures accurate locking when the gate is fully closed.

#### Specification

- ◆ Fully plated for outdoor use
- ◆ Voltage: 12VDC 100%
- ◆ Current Consumption: 1.05A
- ◆ Slam locked on reclose
- ◆ Fail locked on power failure
- ◆ Fits to secure side of fixed leaf on inward opening gates
- ◆ 25mm diameter locking stainless steel removable bar
- ◆ Suits either hand of gate

#### Optional Extras

- ◆ 24VDC
- ◆ Status sensing of locking bolt
- ◆ Solenoid sensing for additional security status
- ◆ Fail open
- ◆ Padlock for key over-ride

#### Applications

- ◆ Secure locking of double gates with integral mechanical drop bolt on fixed leaf
- ◆ Interlocking gates

Designed and manufactured in the UK by Clarke Instruments Ltd
