Gate dimensions

Gate width	2.4 m up to 8 m
Operating speed	4 seconds per metre

Please seek technical advice before specifying sliding gates.

Features:

- Very cost effective
- Integrates with other security products
- No keyed locks
- Full range of RAL colours available

Suitable for:

- Sensitive security areas
- Government sites
- Power and utility sites

Description

The Slidemaster 3 cantilever gate offers the highest level of security. This gate system is ideal for use in sensitive security areas, giving protection for the weakest point. Enhancement for vehicle mitigation can be achieved by fitting other systems in conjunction with the Slidemaster gates.

To compliment this range there are 2 other automatic cantilever gates available for low and medium secure applications.

Construction and finish

The Slidemaster gate is constructed from aluminum and is available in the RAL range of colours.

Description

The Slidemaster range of cantilever sliding gates is revolutionary in their approach to clients needs. These gates are constructed to meet stringent general and high security requirements which make them suited to solving everyday access challenges right through to high security on sensitive sites.

These products are manufactured from extruded aluminum and mild steel, every gate is tested in the factory before delivery to site making them a very cost effective solution. All Slidemaster gates comply with the very latest safety requirements.

Construction and finish

The Slidemaster gate range is constructed from aluminum and steel, available in the RAL range of colours.

Description

The Slidemaster range of cantilever gates is a unique group of products due to the make up of the components.

This automatic Slidemaster 1 gate is able to sustain small scale physical attacks. Any vehicle mitigation barriers can be added behind the gate with other products from the CLD range to give a PAS 68 rating against vehicle borne attacks.

To compliment this range of automatic gates there are two other options to a higher security resistance, the Slidemaster 2 and 3.

Construction and finish

The Slidemaster gate is constructed from aluminum and is available in the RAL range of colours.

Specification clauses

Please contact CLD on 01270 764751

Description

The Slidemaster 2 gate moves security to a different platform now with a medium level of physical security resistance. This advancement now means you can have a product more suited to your individual delay and response time. This helps to align cost with security.

To compliment this range of automatic cantilever gates there are two other options, Slidemaster 3 which gives maximum security against physical attacks and the Slidemaster 1.

Construction and finish

The Slidemaster gate is constructed from aluminum and is available in the RAL range of colours.
