EXHAUST VALVES MODEL AOOJ

AOOJ Exhaust Valves are an aesthetically pleasing terminal device which combine good appearance with accurate control over exhaust air volumes. The careful aerodynamic and acoustic design of the unit ensures low sound levels even at high pressure drop settings.

These valves are manufactured from high quality sheet steel with a RAL 9010 finish and can be easily installed with the aid of the mounting ring, which is supplied with sealing gasket with every unit.

These units can be used for toilet extract, or any extract point requiring an accurate and easily set air volume.

Units with fusible links are available to order. Please contact your local sales office.

Plenum boxes are not supplied.

AOOJ	ØA	ØB	Weight kg
100	140	99	0.3
125	165	124	0.4
160	200	159	0.6
200	250	199	0.9
