WALKWAYS & LINKWAYS

Corefabs specialise in the design, manufacture and installation of Walkways and link ways that enhance buildings and provide an outdoor covered area. We offer a fully bespoke design service, which allows us to tailor your walkway or link way to your exact requirements, and can fit the structure to the space available maximising the covered area for the funds available. A full design consultation will take place with you prior to production and installation to make sure we are providing you with exactly what you require. The structure is fabricated from mild steel and is supplied hot dipped galvanised and polyester powder coated to a RAL colour of your choice, for extra durability, but can also be supplied hot dipped galvanised only.

Free no obligation quotation

Should you require any further information on colours or other general enquiries please call the sales line or send us a quick email, or visit the website.
