DZR BALL VALVES

NEW GENERATION BENEFITS

CRANE FLUID SYSTEMS IS AN INTERNATIONALLY RESPECTED MARKET LEADER IN VALVE TECHNOLOGY AND HAS BEEN MANUFACTURING VALVES FOR NEARLY A CENTURY. THE COMPANY IS NOW INTRODUCING THE NEXT GENERATION OF DZR BALL VALVES FOR WATER, HEATING, VENTILATION, AIR CONDITIONING AND GAS APPLICATIONS.

Designed to be light, compact and easy to operate, Crane's new generation D171A DZR ball valve range is WRAS approved and suitable for use with potable water supplies. The new D191 valve is tested by GL Industrial Services and complies with the essential requirements of BS EN 331: 1998, for gas applications.

Crane's new design of DZR ball valve includes a number of improvements; improved leak resistance and reduced risk of damage from over tightening.

Made of dezincification resistant brass, Crane valves are available in a range of sizes 1/4 to 2in threaded fittings and in metric 15 to 54mm compression diameters. Customers can also choose from a variety of operating handle options which include lever, extended stem, lockshield and 'T' handle versions depending on project application.

THE CUTAWAY SHOWN IS THE THREADED VERSION (D171A)

04. Multiple operating handle options
(Pictured from left), quarter turn lever, extended stem lever, "T" handle & lockshield.

03. Crane pipe threads meet full gauge length.

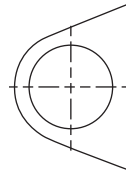

02. Ball is DZR brass chrome plated, designed for a long life.
Temperature range is -10 to 120°C.
Ball is full bore.

01. Primary metal to metal seal.

Improved installation instructions

To aid installation there are new installation tags which are water and tear resistant. They show the correct way of installing threaded or compression valves.

ASSEMBLE PIPE INTO VALVE TO HAND TIGHT THEN TIGHTEN BY NUMBER OF TURNS SHOWN BELOW (UP TO 1 ADDITIONAL TURN IS PERMITTED FOR ALIGNMENT)			
VALVE SIZE	TURNS	VALVE SIZE	TURNS
1/4	1.5	1	1.5
3/8	1.5	1 1/4	1.5
1/2	1.5	1 1/2	1.5
3/4	1.5	2	2

Threaded tag used as example.

05. Quarter turn operation provides positive isolation in conjunction with PTFE, WRAS approved seats and stem seals.

06. Loctite 648 is used on the main joint threads to give more strength and resistance to installation damage.

07. Secondary O ring seal, for additional leakage protection, aids resistance to site installation damage.

08. Available in different taper thread options - BS EN 10226-2 or ANSI B1.20.1.
