

Large Pane Windows and Doors

Pane widths – ‘N’ casements have a traditional 462mm (18¼”) glass width in a fixed pane. Where wider proportions are preferred ‘Z’ casements have a 582mm (23”) glass width.

Double glazing – All large pane windows and large pane doors can be double glazed. Both 14mm (DG Version) and 24mm (L Version) glass thickness can be accommodated.

Top Hung Fanlights – Windows suffixed with ‘F’ and ‘V’ are 305mm high and 285mm high respectively

Sublight – Window types marked * are also available without the lower sublight fixed pane.

Additional ventilation – All windows can be supplied with trickle ventilators to provide weather tight airflow through the top of the window.

Reversible windows – This style ensures safe cleaning and is ideal for multi-storey applications.

Chart Dimensions – All the dimensions listed are width x height.
