

CU INSTALLED

CONTRACT SERVICES

CU Phosco Lighting Contract Services are the market leaders in the design, supply, installation and maintenance of High Mast lighting for large areas and sports facilities. Operating out of two depots in North Yorkshire and Hertfordshire, CU Phosco Lighting undertakes contracts throughout the UK, Europe and the rest of the World, working closely with a number of large organisation including airports, port authorities, highway authorities, rail networks and sports clubs. All CU Phosco Lighting High Mast equipment is designed and manufactured in the UK within a Quality Management system that complies with BS EN ISO 9001:2008.

CU INSTALLED is the new Division of CU Phosco Lighting Contracts Division. The professional and qualified team endeavours to extend the high quality service and portfolio of the Service Division. The new arm aims to build on the fundamentals of working closely with clients to provide exterior lighting solutions. CU INSTALLED can replace lanterns on existing assets or supply complete new installations, which can include columns, lanterns, trenching and cabling.

PROJECT MANAGEMENT

Our project management includes full turnkey solutions. With highly experienced members of the team CU INSTALLED is able to offer a fully bespoke design, supply, installation and maintenance of area lighting and street lighting. Utilising Phosco LED products we can now offer an innovative and energy saving solution to conventional HID flood and street lighting projects. Full feasibility studies can be conducted in house including Total Cost of Ownership inclusive of design, installation and maintenance.

CU INSTALLED is an installation team to support customers requiring the installation of small lighting projects utilising ONE brand and ONE supply chain, particularly for NEW and retrofit LED installations.

MAINTENANCE AND CALL OUT SERVICES

CU Phosco Lighting operates throughout the UK and Europe providing quality maintenance and installation solutions to our clients.

By implementing a structured maintenance programme CU Phosco Lighting can ensure compliance with all current legislation and enhance the life of the equipment.

CU Phosco Lighting also has the ability to carry out maintenance on other manufacturers' equipment.

TRAINING AND WORKFORCE

Our engineers are accredited to the Highways Electrical Registration Scheme and are subject to a continual programme of assesment, training and development.

Credentials include JIB ELECTRICIANS, CSCS, CPCS, G39/1, IPAF, GSAT, PTS.

BRITISH MANUFACTURING

CU Phosco Lighting designs and manufactures exterior lighting luminaires, floodlights, lighting columns and masts in three UK based factories.

Our lighting columns and masts range from 3 metres to 60 metres in height and can be seen on motorways, at airports, in shopping centres, housing estates and sports stadiums throughout the world.

Our range of LED road lanterns are designed and manufactured in the UK. The recent award winning A class P850 impressed judges at the lux awards and continues to take a strong lead in the exterior lighting market for design, quality and performance. The P8 range now incorporates two additional lanterns launched late 2013 continuing the success of the P850. The P851 for P class residential and some M class applications and also the P852 for SOX and lower wattage SON replacement. Our commitment to developing with LED technology has continued in the launch of a specialist floodlighting system for high mast lighting solutions.

HEALTH AND SAFETY

CU Phosco Lighting and CU INSTALLED believe that Health, Safety and the Environment are paramount across the breadth of the operations undertaken by our teams. All activities along with potential hazards are carefully assessed by competent management. RAMs and lift plans are completed 'in-house' by fully qualified Appointed Persons.

CU Phosco Lighting operates an Environmental Management System which complies with the requirements of ISO 14001:2004 for the testing and manufacturing, management of installation, inspection and maintenance of exterior lighting. The system aims to recognise and reduce the impact on the environment.

ACCREDITATIONS

As a long established and premier outdoor lighting group CU Phosco Lighting and CU INSTALLED prides themselves on their commitment to provide a service that upholds to the high standards set out by our accreditations.

CU Phosco Lighting is a member of the Highways Electrical Association and each member of the services team is registered to the HERs scheme.
