## Hampshire Plus 2-Tier

### Key Features of the Hampshire Plus 2-Tier

#### Gas Assisted Lifting

The Hampshire Plus is a two-tier bike parking system designed to maximise storage capacity while ensuring ease of use. Its gas-assisted lifting mechanism makes accessing the upper tier effortless, making it suitable for workplaces, residential developments, and public spaces.

#### 3 Dedicated Locking Points

The Hampshire Plus offers 3 dedicated easy access locking points. These 3 points allow the front and rear wheels to be secured as well as the bike frame.

#### One System, Many Layouts

As the Hampshire system is designed and made in England, we can easily tailor it to suit your site requirements. While the standard centre distance is 375mm, we can adjust it to any custom measurement. We can also arrange the system back-to-back from a central spine to minimise the overall footprint, or angle it to fit within a reduced width.

#### Technical Specification (mm)

Depth	2000
Headroom	2600
Spacing	375 / other centre distances available
Walkway	1700
Colour	Galvanised / PPC available
Materials	Steel
Fixing	Surface mounted
Options	Back-to-back or angled

#### Durable Construction

Constructed from robust materials, the system is designed to withstand daily use and various weather conditions, ensuring longevity and reliability.

#### User-Friendly Design

The system accommodates a wide range of bicycle types and sizes. Its ergonomic design ensures ease of use for all cyclists.

#### Installation & Maintenance

The Hampshire Plus system is designed for straightforward installation, with options for anchoring to various surfaces.

Minimal maintenance is required due to the durable materials and design.
