Transforming bike storage

DONCASTER CIVIC CENTRE

WWW.CYCLEPODS.CO.UK - T:0845 094 0490 - F:0845 094 0151 - INFO@CYCLEPODS.CO.UK

Cyclepods designed this specific project for two sets of Island Spacepods, complete with a specially designed, elongated glass canopy for shelter, at Doncaster Civic Centre.

The client wanted a form of bike storage that would stand out and make a statement in a bid to encourage cyclists to the Civic Centre and accommodate existing cyclists. The area desired for the project was on an un-level piece of land and so this had to be taken carefully into consideration when drawing up plans for the project.

We came up with this striking design based on an amalgamation of two of our products, the Spacepod and our flagship product, The Cyclepod.

Using 98 Spacepods and 2 Cyclepod units, we created two 'islands' of bike storage, each boasting 57 bike spaces. The products were also provided in a matt grey finish which added a more professional and aesthetic look.

The uneven surface was combated by designing the islands based on a stepped level base, meaning that costly levelling did not need to be carried out by the client.

The whole project was completed in 5 days and has provided Doncaster with a proud addition to their Civic Centre, and hopefully motivated more people to cycle to and from the centre.
