WINCHESTER COMPOUND

WWW.CYCLEPODS.CO.UK - T:0845 094 0490 - F:0845 094 0151 - INFO@CYCLEPODS.CO.UK

CONSTRUCTION

The Winchester compound is a modular construction cycle hub that can be adapted to fit any space. Due to its easy build design, manufacturing lead times and on site installation time is minimised.

The compound requires minimal groundworks and has an array of extras that can be added on to suit your requirements. We can add lighting systems, gutters, mix and match cladding, a variety of door styles, access control systems and more.

The compound requires a flat and level concrete surface to be bolted down on to, or can have individual concrete pads laid for each of the legs to reduce the groundworks. Average installation time for a compound is just 5 days!

CLADDING OPTIONS

The Winchester compound can come with a variety of different cladding types and finishes.

- Perforated Steel
- Clear PET G
- Opaque or coloured PET G
- Glass panels
- Wood panelling
- Security style fencing

CLEAR/OPAQUE PET G CLADDING

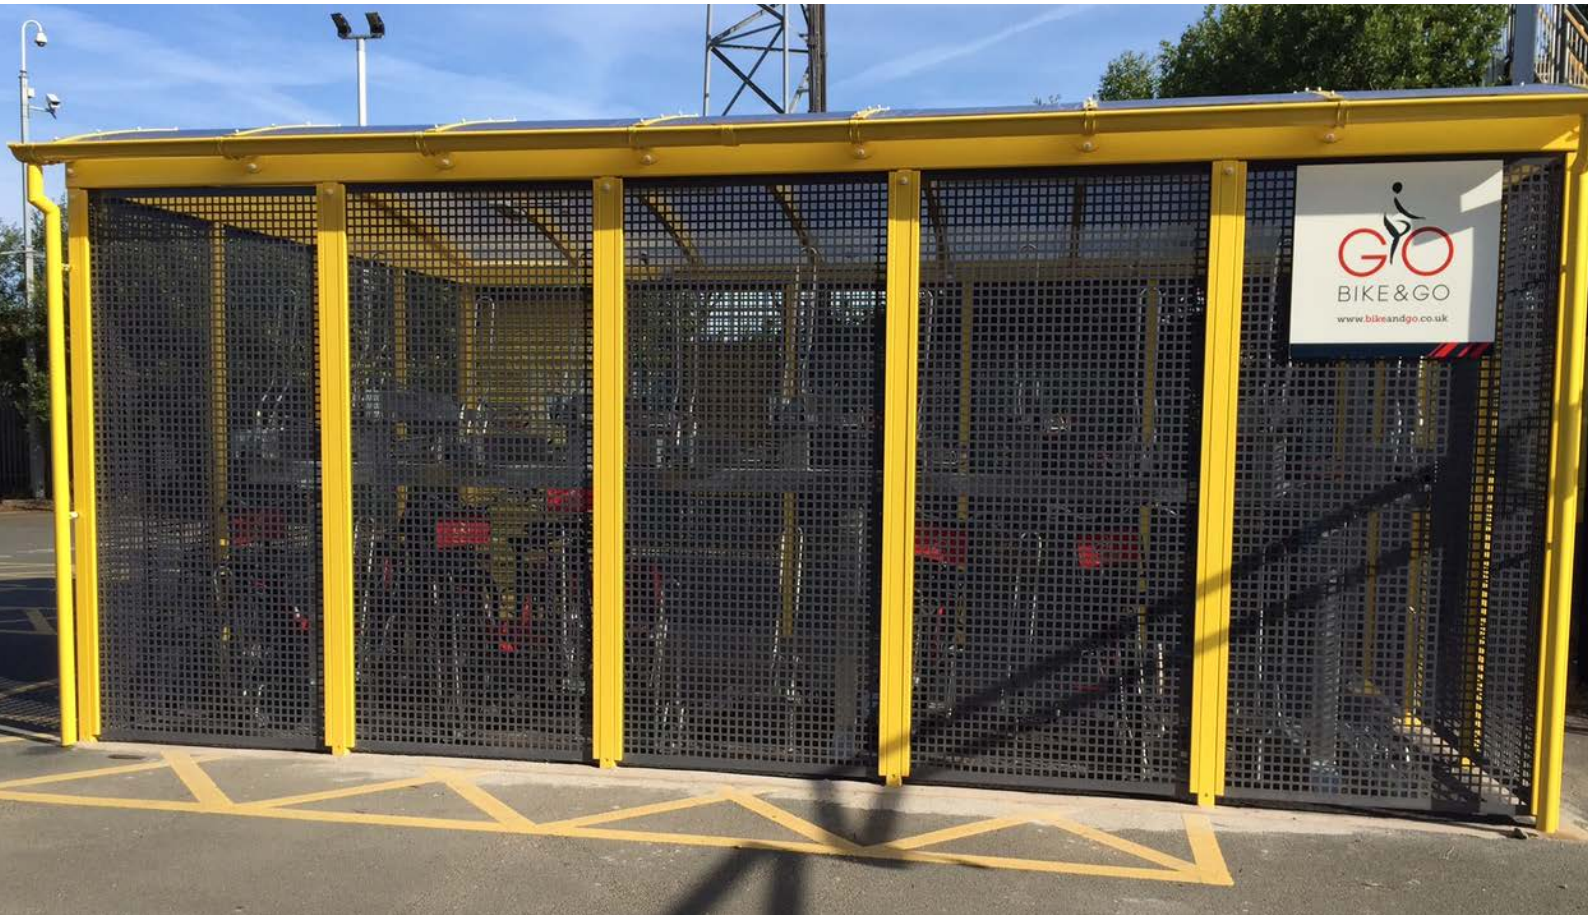

WHITE PET G CLADDING

WOOD PANELLING CLADDING

PERFORATED STEEL CLADDING

ROOFING OPTIONS

The Winchester Compound is available with different styles of roofing. It can be produced with a flat, curved or sloped roof, and the slope of the roof can be front to back or left to right, to suit drainage and site requirements. We can also fit a facade around the roof to completely hide it from view and give the compound a much cleaner appearance.
