

# + FIRST CLASS QUALITY ATTRACTIVE PRICING

The iconic smoke vent button, now available with a high-quality plastic housing and extended functionality.

With its elegant high-gloss plastic housing in the iconic D+H design, the new RT 46 series smoke vent button combines stylish aesthetics with outstanding ease of installation. It resembles the existing aluminium push-button externally and allows quicker access to the internal components thanks to the removable door. This creates generous

cable space and makes installation and maintenance considerably easier. The smoke vent button impresses with its durability, reliability and excellent price-performance ratio.

## Product features

- » Distinctive D+H design: An iconic shape that combines style and functionality
- » Easy maintenance and quicker access to internal components
- » Generous cable compartment: More space for neat and tidy cabling
- » Durable and robust, thanks to the use of high-quality plastic
- » Existing operation units fit into both the plastic and aluminium push-buttons
- » Integrated QR code enables easy access to important service information

## Technical details

- » For D+H smoke vent control panels
- » Can be used as main and auxiliary operation panel
- » Integrated ventilation button (optional)
- » Function: SHEV OPEN, SHEV reset
