Old MacDonalds Nursery

DeckWright
Anti-Slip

timber treatment • timber & metal components • anti-slip decking

“The children feel very happy and secure to play all over the new non-slip decking, even in wet weather.”

Old MacDonalds Nursery in East Yorkshire offers day care for pre-school children. Situated on a farm, the nursery enjoys a nature and adventure play area amongst the trees but the moist, leafy surface could become slippery.

Nursery owner, Liz Walker decided to create a new timber decking area, choosing DeckWright for its anti-slip properties. Here's what she had to say:

“I have actually used DeckWright Anti-Slip before and been more than happy with the results so it seemed an ideal surface to use for my nursery. I wanted to create a safe, all weather surface under the trees and also cover up an old sand pit effectively.

Given that children would run around on the decking, I weighed up the pros and cons of using an anti-slip decking product; aware of the possibility of the odd graze. But this has never been a problem and the children feel very happy and secure to play all over the new non-slip decking, even in wet weather.

DeckWright Anti-Slip was very easy to install and our joiner could quickly cut it to size whilst fitting it, using normal tools. The installation was complete in one day.

Not only are the children delighted, parents have commented very positively on the new anti-slip decking area amongst the trees.

I feel that DeckWright would be an ideal outdoor surface for schools, nurseries, hospitals and old peoples' homes as it is a safe alternative to normal decking, which does get slippery in wet weather. DeckWright Anti-Slip decking is just as easy to clean as standard timber decking, it looks great and lasts well.”

10 reasons to choose DeckWright Anti-Slip

- 1.** Easily cut to size on-site, using standard tools.
- 2.** Suitable for both heavy commercial traffic and domestic locations.
- 3.** Ideal for contractors, merchants, architects, home users, holiday parks, bars and restaurants, play areas and schools.
- 4.** Purchase for a particular project (no minimum order) or stock it in your store as a retail product if you're a merchant.
- 5.** Got a particular specification of decking you want anti-slipped? Our process is suitable for the majority of decking profiles.
- 6.** Tested by the Health and Safety Laboratory in Buxton in accordance with BS7976: 2002. It achieved a high PTV score of 71, which is considered "highly anti-slip".
- 7.** Whether you need brand new anti-slip decking or retro-fit inserts for existing timber decking, DeckWright Anti-Slip has a solution.
- 8.** Install it once; you're doing a proper job that will last for years.
- 9.** Colour customisation is available should you require it.
- 10.** Supplied with a five year guarantee.

The best accolade for DeckWright Anti-Slip is that our customers keep coming back for more!

DeckWright Anti-Slip is manufactured in Hull and Rochester.
