

## What are DeckWright Inserts?

When timber decking is already laid and proving slippery when wet or dirty, installing DeckWright Inserts can lessen the risk of injury and provide a reassuring grip.

Solving a significant issue for many timber decking owners, our tested and approved DeckWright Inserts can be easily fitted to most profiles of grooved decking, providing an attractive and long-lasting solution to a slippery problem for both domestic and commercial locations.

## Key features of DeckWright Inserts

- ✓ A unique and long-lasting resin and aggregate formulation housed on a T shaped insert and adhered into grooves
- ✓ Retail in a 25 metre kit from a merchandising stand or buy in bulk
- ✓ Tested and approved with a high PTV of 71 (a minimum of 35 is considered "anti-slip")
- ✓ Easy to fit using DeckWright Adhesive (supplied in kit)
- ✓ Use on steps, walkways or larger areas
- ✓ Suitable for heavy commercial traffic in addition to domestic projects
- ✓ Easily cut to length using standard tools (not possible with other anti-slip decking products)
- ✓ Colour customisation is available
